OCCUPATIONAL EMPLOYMENT AND WAGES — MAY 2014

The occupations with the largest employment in May 2014 were retail salespersons and cashiers, the U.S. Bureau of Labor Statistics reported today. These two occupations combined made up nearly 6 percent of total U.S. employment, with employment levels of 4.6 million and 3.4 million, respectively. Of the 10 largest occupations, only registered nurses, with an annual mean wage of \$69,790, had an average wage above the U.S. all-occupations mean of \$47,230. The highest paying occupations overall included several physician and dentist occupations, chief executives, nurse anesthetists, and petroleum engineers. National employment and wage information for all occupations is shown in table 1.

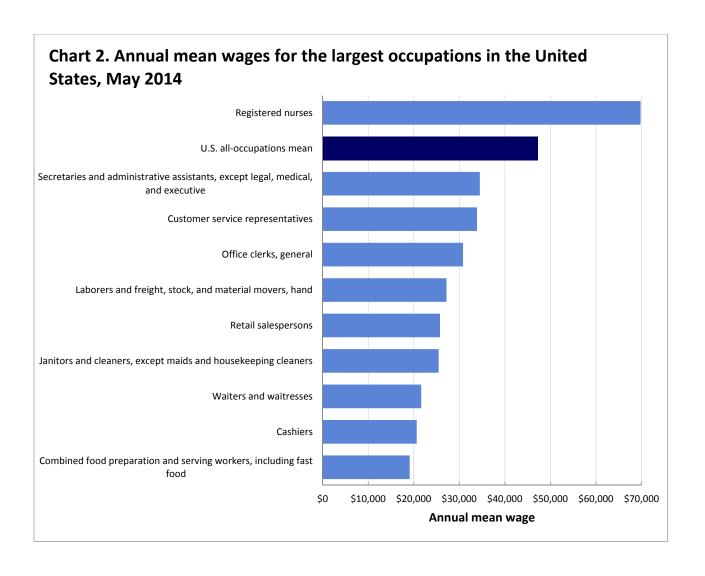

The data in this news release are from the Occupational Employment Statistics program, which produces employment and wage estimates for over 800 occupations for the nation, states, and metropolitan and nonmetropolitan areas; and by industry or ownership at the national level. This release contains data on science, technology, engineering, and mathematics (STEM) occupations. A list of occupations included in the STEM definition used for this release is available at www.bls.gov/oes/stem_list.xlsx.

Occupations

- The 10 largest occupations accounted for 21 percent of total employment in May 2014. In addition to retail salespersons and cashiers, the largest occupations included combined food preparation and serving workers, including fast food; general office clerks; registered nurses; customer service representatives; and waiters and waitresses. (See chart 1.)
- Most of the largest occupations were relatively low paying. Excluding registered nurses, annual mean wages for the rest of the 10 largest occupations ranged from \$19,110 for combined food preparation and serving workers to \$34,500 for secretaries and administrative assistants, except legal, medical, and executive. Combined food preparation and serving workers also was one of the lowest paying occupations overall, along with fast food cooks (\$19,030), shampooers (\$19,480), and dishwashers (\$19,540). (See chart 2.)
- There were over 8.3 million STEM jobs in May 2014, representing about 6.2 percent of total U.S. employment. Seven of the 10 largest STEM occupations were related to computers. These occupations included applications software developers, with employment of 686,470; computer user support specialists (563,540); and computer systems analysts (528,320). Wholesale and manufacturing sales representatives of technical and scientific products (335,540) was the largest STEM occupation that was not specifically computer related. (See table 1.)

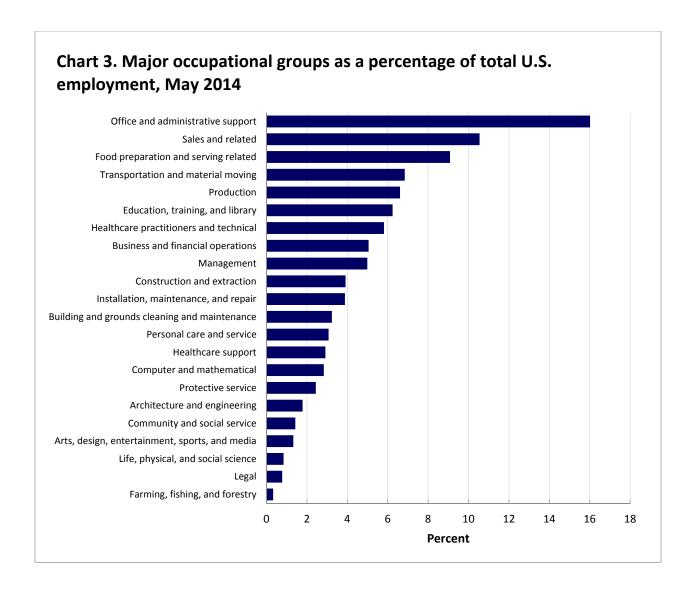

- Ninety-three of the 100 STEM occupations had mean wages significantly above the alloccupations average. The highest paying STEM occupations included petroleum engineers, with an annual mean wage of \$147,520; physicists (\$117,300); and the three STEM-related management occupations. The lowest paying STEM occupations included agricultural and food science technicians (\$37,330) and forest and conservation technicians (\$37,990). (See table 1.)
- Office and administrative support was the largest occupational group, making up about 16 percent of total U.S. employment. The next largest groups were sales and related occupations and food preparation and serving related occupations, which made up about 11 percent and 9 percent of U.S. employment, respectively. The smallest occupational groups included farming, fishing, and forestry occupations; legal occupations; and life, physical, and social science occupations, each making up less than 1 percent of total employment. (See chart 3.)
- The highest paying occupational groups were management, legal, and computer and mathematical occupations. The lowest paying occupational groups included food preparation and serving related; personal care and service; and farming, fishing, and forestry occupations, each with an annual mean wage of about \$25,000 or less. (See table 1.)

Occupational profiles for all occupations are available at www.bls.gov/oes/current/oes_stru.htm.

Ownership

- Overall, the private sector accounted for about 84 percent of employment, but made up a higher share of employment in some occupations. Occupations found only in the private sector included flight attendants, oil and gas roustabouts, funeral attendants, and a number of production occupations, such as semiconductor processors and tire builders.
- Eight of the 10 largest occupations in the private sector were the same as those in the economy as a whole as shown in chart 1. Stock clerks and order fillers and general and operations managers rounded out the largest private sector occupations.
- Occupations found only in the public sector included tax examiners and collectors, and
 revenue agents; judges, magistrate judges, and magistrates; and fish and game wardens.
 Although found in both the public and private sectors, conservation scientists, emergency
 management directors, zoologists and wildlife biologists, and many types of postsecondary
 teachers also had above-average shares of their employment in the public sector.

- Five of the 10 largest occupations in the public sector were related to education, including elementary school teachers, except special education, with public sector employment of over 1.2 million; teacher assistants (933,500); and secondary school teachers, except special and career/technical education (845,480). These occupations were found primarily in local government.
- The largest occupations in state government were correctional officers and jailers; general office clerks; and secretaries and administrative assistants, except legal, medical, and executive. Registered nurses, management analysts, and compliance officers were among the largest occupations in federal government.

OES data by ownership are available at www.bls.gov/oes/current/oessrci.htm.

Industry

 Health care and social assistance and retail trade were the industry sectors with the largest employment. Over half of May 2014 employment in the health care and social assistance sector was in healthcare related occupations. Registered nurses, with sector employment of nearly 2.4 million; nursing assistants (1.3 million); and personal care aides (1.2 million) were the largest occupations in this sector. More than 60 percent of retail trade employment was in only 4 occupations: retail salespersons, cashiers, stock clerks and order fillers, and first-line supervisors of retail sales workers.

- Some occupations were highly concentrated in specific industries, while other occupations were more widely distributed across industries. For example, about 81 percent of biochemists and biophysicists were found in only three industries: scientific research and development services; pharmaceutical and medicine manufacturing; and colleges, universities, and professional schools. On the other hand, general office clerks were employed in over 280 industries, with no single industry accounting for more than about 6 percent of jobs in this occupation.
- Industries with the highest all-occupations mean wages included software publishers, computer and peripheral equipment manufacturing, and several financial services industries. These industries tended to have high employment concentrations of occupations with high wages. For example, the largest occupations in the security and commodity contracts intermediation and brokerage industry included securities, commodities, and financial services sales agents, with an annual mean wage of \$136,920; personal financial advisors (\$119,180); and financial analysts (\$110,510). By comparison, in restaurants and other eating places, the industry with the lowest overall average wage, 4 of the 5 largest occupations had annual mean wages below \$25,000.
- Wages for individual occupations could also differ greatly across industries. For example, wages for computer systems analysts varied by industry from \$58,940 in motor vehicle body and trailer manufacturing to \$118,770 in support activities for mining. Wages for meeting, convention, and event planners ranged from \$26,550 in book stores and news dealers to \$83,560 in aerospace product and parts manufacturing.

OES national industry-specific data are available at www.bls.gov/oes/current/oessrci.htm.

State and Local Area

- States and metropolitan areas with large total employment also tended to have the largest employment of many individual occupations. However, employment concentrations for a given occupation often varied by geographic area. For example, as a percentage of total state employment, Massachusetts and Virginia had about 2.9 and 2.6 times as many systems software developers, respectively, as the U.S. as a whole. At the metropolitan area level, this occupation was particularly concentrated in San Jose-Sunnyvale-Santa Clara, Calif., and the Framingham, Mass., NECTA division, both of which had concentrations of systems software developers nearly 10 times the U.S. average.
- Some occupations were especially concentrated geographically. For example, about 70 percent of petroleum engineers were employed in only three states: Texas, Oklahoma, and California. Metropolitan areas with the highest concentrations of this occupation included Midland, Texas, which had a concentration of petroleum engineers nearly 72 times the U.S. average; Casper, Wyo.; and Houston-Sugarland-Baytown, Texas.

• Wages for a given occupation also varied by area. In addition to having a high employment concentration of systems software developers, San Jose-Sunnyvale-Santa Clara, Calif., also was the highest paying metropolitan area for this occupation, with an annual mean wage of \$138,410. Wages for systems software developers in other metropolitan areas ranged from \$52,720 in Lafayette, La., to \$124,220 in the Oakland-Fremont-Hayward, Calif., metropolitan division. At the state level, wages for this occupation ranged from \$68,580 in North Dakota to \$124,070 in California.

OES data, including location quotients, by state and metropolitan/nonmetropolitan area are available at www.bls.gov/oes/current/oessrcst.htm and www.bls.gov/oes/current/oessrcma.htm, respectively.

Technical Note

Scope of the survey

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; nearly 650 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), metropolitan divisions, nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-, 4-, and selected 5- and 6-digit industry levels; and national estimates by ownership across all industries and for schools and hospitals.

The OES survey is a cooperative effort between BLS and the State Workforce Agencies (SWAs). BLS funds the survey and provides the procedures and technical support, while the State Workforce Agencies collect most of the data. OES estimates are constructed from a sample of about 1.2 million establishments. Each year, forms are mailed to two semiannual panels of approximately 200,000 sampled establishments, one panel in May and the other in November. May 2014 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2014, November 2013, May 2013, November 2012, May 2012, and November 2011. The overall national response rate for the six panels is 74.3 percent based on establishments and 70.5 percent based on weighted sampled employment. The unweighted employment of sampled establishments across all six semiannual panels represents approximately 57.1 percent of total national employment. (Response rates are slightly lower for these estimates due to the federal shutdown in October 2013.)

The occupational coding system

The OES survey categorizes workers into 821 detailed occupations based on the Office of Management and Budget's 2010 Standard Occupational Classification (SOC) system. Together, these detailed occupations make up 22 of the 23 SOC major occupational groups. Major group 55, Military Specific Occupations, is not included.

For more information about the SOC system, please see the BLS website at www.bls.gov/soc/.

The industry coding system

The May 2014 OES estimates use the 2012 North American Industry Classification System (NAICS). For more information about NAICS, see the BLS website at www.bls.gov/bls/naics.htm.

The OES survey excludes the majority of the agricultural sector, with the exception of logging (NAICS 113310), support activities for crop production (NAICS 1151), and support activities for animal production (NAICS 1152). Private households (NAICS 814) also are excluded. OES federal government data include the U.S. Postal Service and the federal executive branch only. All other industries, including state and local government, are covered by the survey.

Survey sample

The OES survey draws its sample from state unemployment insurance (UI) files. Supplemental sources are used for rail transportation (NAICS 4821) and Guam because they do not report to the UI program. The OES survey sample is stratified by metropolitan and nonmetropolitan area, industry, and size.

To provide the most occupational coverage, larger employers are more likely to be selected than smaller employers. A census is taken of the executive branch of the federal government, the U.S. Postal Service, and state government.

Concepts

Occupational employment is the estimate of total wage and salary employment in an occupation. The OES survey defines employment as the number of workers who can be classified as full- or part-time employees, including workers on paid vacations or other types of paid leave; workers on unpaid short-term absences; salaried officers, executives, and staff members of incorporated firms; employees temporarily assigned to other units; and employees for whom the reporting unit is their permanent duty station, regardless of whether that unit prepares their paycheck. The survey does not include the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers.

Wages for the OES survey are straight-time, gross pay, exclusive of premium pay. Base rate; cost-of-living allowances; guaranteed pay; hazardous-duty pay; incentive pay, including commissions and production bonuses; and tips are included. Excluded are overtime pay, severance pay, shift differentials, nonproduction bonuses, employer cost for supplementary benefits, and tuition reimbursements.

OES receives wage rate data for the federal government, the U.S. Postal Service, and some state governments. For the remaining establishments, the OES survey collects wage data in 12 intervals. For each occupation, respondents are asked to report the number of employees paid within specific wage intervals. The intervals are defined both as hourly rates and the corresponding annual rates, where the annual rate for an occupation is calculated by multiplying the hourly wage rate by a typical work year of 2,080 hours. The responding establishments are instructed to report the hourly rate for parttime workers, and to report annual rates for occupations that are typically paid at an annual rate but do not work 2,080 hours per year, such as teachers, pilots, and flight attendants. Other workers, such as some entertainment workers, are paid hourly rates, but generally do not work 40 hours per week, year round. For these workers, only an hourly wage is reported.

Estimation methodology

The OES survey is designed to produce estimates by combining six panels of data collected over a 3-year period. Each OES panel includes approximately 200,000 establishments. The full six-panel sample of nearly 1.2 million establishments allows the production of estimates at detailed levels of geography, industry, and occupation.

Wage updating. Significant reductions in sampling errors are obtained by combining six panels of data, particularly for small geographic areas and occupations. Wages for the current panel need no adjustment. However, wages in the five previous panels need to be updated to the current panel's reference period.

The OES program uses the BLS Employment Cost Index (ECI) to adjust survey data from prior panels before combining them with the current panel's data. The wage updating procedure adjusts each detailed occupation's wage rate, as measured in the earlier panel, according to the average movement of its broader occupational division.

Imputation. About 25 percent of establishments do not respond for a given panel. For most employers, a "nearest neighbor" hot deck imputation procedure is used to impute missing occupational employment totals. A variant of mean imputation is used to impute missing wage distributions. In some cases, data for current panel nonrespondents are available for earlier panels. In those cases, the older data may be used and aged to represent the current reference period.

Weighting and benchmarking. The sampled establishments are weighted to represent all establishments for the reference period. Weights are further adjusted by the ratio of employment totals (the average of November 2013 and May 2014 employment) from the BLS Quarterly Census of Employment and Wages to employment totals from the OES survey.

Changes and special procedures for the May 2014 estimates

In previous sets of estimates, local government gambling establishments and casino hotels were included in OES-defined industry 999300 Local Government. Beginning with the May 2014 estimates, local government gambling establishments and casino hotels will be included in NAICS 7132 Gambling Industries and 72112 Casino Hotels, respectively, along with private sector establishments in those industries.

The Quarterly Census of Employment and Wages program, from which the OES sample is drawn, has recently begun coding some establishments that were historically found in NAICS 814110 Private Households to NAICS 624120 Services for the Elderly and Persons with Disabilities. Private households are out of scope for OES, so this shift caused a scope increase for OES in NAICS 624120. Because this scope increase affected only the most recent (May 2014) of the six survey panels used to produce the May 2014 OES estimates, the units that shifted industries were removed from the survey data and not used in estimation.

For more information

Answers to frequently asked questions about the OES data are available at www.bls.gov/oes/oes_ques.htm. Detailed technical information about the OES survey is available in the Survey Methods and Reliability Statement on the BLS website at www.bls.gov/oes/current/methods_statement.pdf.

Table 1. National employment and wage data from the Occupational Employment Statistics survey by occupation, May 2014

Welding, soldering, and brazing machine setters, operators, and tenders		17.53	36,450	16.91
Miscellaneous metal workers and plastic workers		17.41	36,200	16.25
Heat treating equipment setters, operators, and tenders, metal and plastic		17.72	36,850	16.98
Layout workers, metal and plastic		22.26	46,290	21.65
Plating and coating machine setters, operators, and tenders, metal and plastic		15.54	32,330 37.380	14.52
Tool grinders, filers, and sharpeners		17.97 16.99	- ,	17.03 15.45
Metal workers and plastic workers, all other Printing workers	,	17.29	35,340 35,960	16.47
Printing workers		17.29	35,960	16.47
Prepress technicians and workers.		18.75	39,000	17.89
Printing press operators		17.64	36,700	16.87
Print binding and finishing workers		15.11	31,420	14.19
Textile, apparel, and furnishings workers		11.99	24,940	10.86
Laundry and dry-cleaning workers		10.66	22,170	9.77
Pressers, textile, garment, and related materials	50,150	10.22	21,260	9.69
Sewing machine operators		11.54	23,990	10.54
Shoe and leather workers	11,260	12.51	26,010	11.55
Shoe and leather workers and repairers		12.42	25,840	11.43
Shoe machine operators and tenders		12.69	26,390	11.90
Tailors, dressmakers, and sewers		13.57	28,220	12.31
Sewers, hand		12.01	24,980	11.36
Tailors, dressmakers, and custom sewers		14.03	29,170	12.72
Textile machine setters, operators, and tenders		12.99	27,020	12.64
Textile bleaching and dyeing machine operators and tenders Textile cutting machine setters, operators, and tenders		12.70 12.86	26,410 26,760	11.99 12.30
Textile knitting and weaving machine setters, operators, and tenders		13.41	27,890	13.11
Textile winding, twisting, and drawing out machine setters, operators, and tenders		12.83	26,680	12.62
Miscellaneous textile, apparel, and furnishings workers.		16.16	33,610	14.95
Extruding and forming machine setters, operators, and tenders, synthetic and glass fibers		16.39	34,090	15.85
Fabric and apparel patternmakers		22.73	47,280	19.86
Upholsterers	29,770	16.00	33,280	15.33
Textile, apparel, and furnishings workers, all other	16,110	13.95	29,010	12.72
Woodworkers	229,870	14.78	30,740	13.90
Cabinetmakers and bench carpenters		16.11	33,500	15.18
Furniture finishers		14.74	30,660	13.85
Model makers and patternmakers, wood		17.67	36,760	16.21
Model makers, wood		16.62	34,570	14.88
Patternmakers, wood		19.17 13.71	39,870 28,510	18.26 13.13
Sawing machine setters, operators, and tenders, wood		13.66	28,410	13.13
Woodworking machine setters, operators, and tenders, except sawing		13.74	28,580	13.20
Woodworkers, all other		15.10	31,410	13.51
Plant and system operators		27.49	57,170	26.86
Power plant operators, distributors, and dispatchers		34.89	72,560	35.05
Nuclear power reactor operators		39.55	82,270	39.66
Power distributors and dispatchers		37.58	78,170	37.62
Power plant operators	40,300	33.28	69,220	33.69
Stationary engineers and boiler operators		27.92	58,070	27.08
Water and wastewater treatment plant and system operators		22.18	46,140	21.20
Miscellaneous plant and system operators		28.79	59,890	28.66
Chemical plant and system operators		27.01	56,170	26.88
Gas plant operators		30.48	63,400	30.82
Petroleum pump system operators, refinery operators, and gaugers		30.37	63,160	30.21
Plant and system operators, all other		26.56	55,240	26.55
Other production occupations		16.00	33,270	14.56
Chemical processing machine setters, operators, and tenders		22.09	45,940	21.22
Chemical equipment operators and tenders Separating, filtering, clarifying, precipitating, and still machine setters, operators, and tenders		23.63 19.78	49,150 41,150	23.12 18.55
Crushing, grinding, polishing, mixing, and blending workers		16.72	34,780	15.89
Crushing, grinding, polishing, mixing, and blending workers		16.72	34,700	15.89
Grinding and polishing workers, hand		14.41	29,980	13.63
Mixing and blending machine setters, operators, and tenders		17.28	35,950	16.51

¹ Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.

 $^{^{2}}$ Wages for some occupations that do not generally work year-round, full time, are reported either as hourly wages or annual salaries depending on how they are typically paid.

³ Represents a wage above \$90.00 per hour.
