## Project 4\&5: Using the Diary Survey and EXPN Files

## Project 4

If you need to include complete estimates for education expenditures in your totals, you would use the diary EXPD file to fill in the blanks at the summarized level (using created number of children variable from the MEMD files for this example)

In this project you will:

- Learn how to navigate the Diary EXPD file
- Learn how to connect the FMLD, MEMD EXPD files
- Learn how to "integrate" data

## Project 4 Steps

1. Concatenate 4 quarterly FMLD files to obtain a collection year of data
2. Repeat for the MEMD files
3. Generate the number of children per household by creating the Children count variable
4. Using the EXPD files, create summary Diary education expenditures at the household level using the education UCC that is sourced from the Diary survey (660000-School supplies, etc. - unspecified)
5. Multiply estimates by 52 to obtain estimated annual totals from the weekly estimates
6. Calculate means based on number of children from Diary
7. Standard Error: Calculate standard error for each of the groups
8. Add Diary means for each group to the Interview means

## Project 4 Results CUs with 0 children

| Education Expenditure Type | Education Expenditure Mean | Education Expenditure Standard Error | Education <br> Expenditure <br> Percent <br> Reporting |
| :---: | :---: | :---: | :---: |
| TUITION | \$ 648.28 | \$ 54.65 | 3.65\% |
| TEST | \$ 5.76 | \$ 1.35 | 0.34\% |
| BOOKS | \$ 7.49 | \$ 1.11 | 0.77\% |
| OTHER | \$ 14.08 | \$ 2.75 | 0.97\% |
| SUPPLIES | \$ 46.22 | \$ 3.52 | 5.23\% |
| TOTAL | \$ 721.83 |  |  |

## Project 5

What if you want to know what kind of school or facility the expense was made toward and whether the expense was for someone inside or outside the CU? We can use the EDA file to get that information.

In this project you will:

- Learn more about the structure of one of the EXPN files
■ See an example of non-expenditure information associated with an expenditure category

## Using EXPN files

■ In contrast to other Interview data files, EXPN files contain data from all 5 quarters of interviews in each file.
$\square$ Five variables are common to all EXPN files: QYEAR, NEWID, SEQNO, ALCNO and REC_ORIG.

## Using EXPN files

■ QYEAR represents the quarter and year of the interview from which the record was derived.

- The format for QYEAR is:
- 20211 2020, $1^{\text {st }}$ quarter
- 20212 2020, $2^{\text {nd }}$ quarter
- 20213 2020, $3^{\text {rd }}$ quarter
- 20214 2020, $4^{\text {th }}$ quarter
- 20221 2021, $1^{\text {st }}$ quarter

BLS

## Project 5 Steps

1. Read in EDA files and subset for education expenses reported for interviews conducted in 2021
2. Remove records with QYEAR $=2021$
3. Calculate one-way frequency count based on the school or facility the expense was made toward (EDSCHL_A)
4. Calculate two-way frequency count based on the school or facility the expense was made toward and if the expense was made for someone inside or outside the CU (EDUCGFTC)
5. Calculate two-way frequency count based on the type of expense (EDUC AY) and the school or facility the expense was made toward

## Project 5 Results Count of expenditures by school type

| School | Frequency | Percent | Cumulative <br> Frequency | Cumulative <br> Percent |
| :--- | :--- | :--- | :--- | :--- |
| Not specified | 2395 | $51.93 \%$ | 2395 | $51.93 \%$ |
| College or university | 1388 | $30.10 \%$ | 3783 | $82.03 \%$ |
| Elementary through high <br> school |  | $13.14 \%$ | 4389 | $95.16 \%$ |
| Child day care center | 19 | $0.41 \%$ | 4408 | $95.58 \%$ |
| Nursery school or <br> preschool | 23 | $0.50 \%$ | 4431 | $96.08 \%$ |
| Vocational or technical <br> school | 66 | $1.43 \%$ | 4497 | $97.51 \%$ |
| Other school | 115 | $2.49 \%$ | 4612 | $100.00 \%$ |

# Project 5 Results <br> Count of expenditures by school type and recipient tenure
