HIGHLIGHTS OF RICHLAND–KENNEWICK–PASCO, WA NATIONAL COMPENSATION SURVEY AUGUST 2005

Workers in the Richland–Kennewick–Pasco, WA metropolitan area averaged \$21.22 per hour during August 2005, according to a new survey released by the Bureau of Labor Statistics of the U.S. Department of Labor. Regional Commissioner Richard J. Holden reported that white collar workers averaged \$26.15 per hour and accounted for 54 percent of the workers in the area. Blue collar employees averaged \$17.82 per hour and represented 24 percent of the workforce, while the remaining employees worked in service occupations and earned \$12.63 per hour. (See table 1.)

The National Compensation Survey (NCS) presents straight-time earnings for occupations in establishments employing 50 or more workers in private industry and State and local governments. The survey excludes agricultural establishments, private households, the self-employed, and the Federal Government. This NCS covered 115 firms representing 34,000 workers in the Richland–Kennewick–Pasco, WA metropolitan area, which consists of Benton and Franklin Counties. Within this survey, 72 percent of these employees worked in private industry.

In the Richland–Kennewick–Pasco, WA metropolitan area, average hourly wages were published for 20 detailed occupations. (See table 1.) Among white collar workers, registered nurses averaged \$28.11 per hour; receptionists \$11.30; and cashiers \$9.12. Blue collar occupations included electricians earning \$30.15 per hour, and industrial truck and tractor equipment operators earning \$13.14. In service occupations, firefighters averaged \$21.60 per hour and maids and housemen earned \$8.76.

The NCS also provides broad coverage of selected occupational characteristics. (See tables 2 and 3.) For example, full-time employees in the Richland–Kennewick–Pasco, WA area averaged \$23.06 per hour and part-time employees averaged \$9.81. Union workers averaged \$21.99 per hour, while their nonunion counterparts made \$20.64. Union workers in service jobs earned \$19.40 per hour compared to nonunion workers who averaged \$ 9.17. Private industry workers at establishments employing 50-99 workers averaged \$11.67 per hour and those in establishments with 500 or more employees earned \$31.83.

The NCS is part of a statistical program that integrates three previously separate surveys of wages and benefits into one comprehensive compensation program increasing the amount of data available. Data provided by the NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use the data to help choose potential careers. Average rates of pay are also available for levels of work within an occupation based on knowledge, skill, independent judgment, supervision received and other factors required on the job.

Survey Availability

Complete survey results are contained in the Richland–Kennewick–Pasco, WA, National Compensation Survey August 2005 (Bulletin 3130-20). While supplies last, single copies of the bulletin are available from the San Francisco Information Office by calling 415-975-4350. In addition, data contained in the bulletin are available on the Internet in both text and PDF formats at <http://www.bls.gov/ncs/ocs/compub.htm>.

For personal assistance or further information on the National Compensation Survey, as well as other Bureau programs, contact the San Francisco Information Office at 415-975-4350 from 9:00 a.m. to 11:30 a.m. and 1:30 p.m. to 4:00 p.m., Pacific Time, Monday - Friday.

Information in this release will be made available to sensory impaired individuals upon request.

¹ Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

² All workers include full-time and part-time workers.

³ A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. See appendix B in the full bulletin for more information.

⁴ The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate. For more information about RSEs, see appendix A in the full bulletin.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria, and n.e.c. means "not elsewhere classified." Overall occupational groups may include data for categories not shown separately.

¹ Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

² A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. See appendix B in the full bulletin for more information.

³ Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

⁴ Union workers are those whose wages are determined through collective bargaining.

⁵ Time workers' wages are based solely on an hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production bonuses.

⁶ The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate. For more information about RSEs, see appendix A in the full bulletin.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.

1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

2 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. See appendix B in the full bulletin for more information.

3 Establishments classified with 50-99 workers may contain establishments with fewer than 50 due to staff reductions between survey sampling and collection.

4 The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate. For more information about RSEs, see appendix A in the full bulletin.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria.
