¹ Based on the North American Industry Classification System, 2002.

² Includes fatalities to workers employed by governmental organizations regardless of industry.

³ Includes 2 fatalities that occurred within the territorial boundaries of the United States, but a State of incident could not be determined.

NOTE: Totals for 2004 are revised and final. Totals for major categories may include subcategories not shown separately. Percentages may not add to totals because of rounding. Dashes indicate no data reported or data that do not meet publication criteria. There were 4 fatalities for which there was insufficient information to determine a specific industry classification, though a distinction between private and government was made for each.
