Consumer Price Movements December 2007

The Consumer Price Index for All Urban Consumers (CPI-U) decreased 0.1 percent in December before seasonal adjustment. The December level of 210.036 (1982-84=100) was 4.1 percent higher than in December 2006.

The Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) decreased 0.1 percent in December prior to seasonal adjustment. The December level of 205.777 (1982-84=100) was 4.3 percent higher than in December 2006.

The Chained Consumer Price Index for All Urban Consumers (C-CPI-U) decreased 0.1 percent in December on a not seasonally adjusted basis. The December level of 121.088 (December 1999=100) was 3.4 percent higher than in October 2006. Please note that the indexes for the post-2005 period are subject to revision.

CPI for All Urban Consumers (CPI-U)

On a seasonally adjusted basis, the CPI-U increased 0.3 percent in December, following a 0.8 percent rise in November. The index for energy advanced 0.9 percent and accounted for about one-third of the overall CPI increase in December. The index for petroleum-based energy rose 1.2 percent and the index for energy services, 0.5 percent. The food index rose 0.1 percent in December. The index for food at home was virtually unchanged, while the index for food away from home increased 0.2 percent. The index for all items less food and energy advanced 0.2 percent in December, following a 0.3 percent increase in November. Smaller increases in the indexes for apparel, for medical care, for recreation, and for new vehicles were responsible for the more moderate increase in December.

Table A. Percent changes in CPI for All Urban Consumers (CPI-U)

Special indexes:									
Energy	-.5	-1.0	-3.2	.3	1.4	5.7	.9	37.1	17.4
Food5	.3	.4	.5	.3	.3	.1	2.4	4.9
All items less food and energy2	.2	.2	.2	.2	.3	.2	2.7	2.4

Consumer prices advanced at a seasonally adjusted annual rate (SAAR) of 5.6 percent in the fourth quarter of 2007. This followed increases in the first three quarters at annual rates of 4.7, 5.2, and 1.0 percent, respectively. For the 12 month period ended in December, the CPI-U rose 4.1 percent. This compares with an increase of 2.5 percent in 2006. The index for energy, which advanced at annual rates of 22.9 and 32.9 percent in the first two quarters, declined at a 14.8 percent rate in the third quarter, turned back up in the fourth quarter, advancing a 37.1 percent annual rate. Overall energy costs rose 17.4 percent in 2007 with the index for petroleum-based energy costs (energy commodities) up 29.4 percent and charges for energy services (gas and electricity) up 3.4 percent. The food index, which rose 2.1 percent in all of 2006, advanced 4.9 percent in 2007, its largest increase since a 5.3 percent rise in 1990. Grocery store food prices increased 5.6 percent in 2007, reflecting acceleration over the last year in each of the six major groups. These increases ranged from 3.2 percent in the index for other food at home to 13.4 percent in the index for dairy products.

Excluding food and energy, the CPI-U advanced at a 2.7 percent SAAR in the fourth quarter, following increases at rates of 2.3, 2.3, and 2.5 percent in the first three quarters of 2007. The 2.4 percent advance for all of 2007 compares with a 2.6 percent rise in 2006. The deceleration reflects a smaller increase in the index for shelter, in particular the index for owners' equivalent rent, and a small decrease in the index for apparel. Shelter costs, which rose 4.2 percent in all of 2006, increased 3.1 percent in 2007. The index for owners' equivalent rent rose 2.8 percent in 2007 after a 4.3 percent increase in 2006. The index for apparel, which last year registered its first annual increase since 1997--up 0.9 percent--declined 0.3 percent in 2007. The annual rates for selected groups for the last eight years are shown below.

Table Q4. Annual percent changes in the CPI for All Urban Consumers, 2000-2007

Expenditure Category	Percentage change 12 months ended in December							
	2000	2001	2002	2003	2004	2005	2006	2007

All items less energy	2.6	2.8	1.8	1.5	2.2	2.2	2.5	2.8
Food	2.8	2.8	1.5	3.6	2.7	2.3	2.1	4.9
All items less food and energy	2.6	2.7	1.9	1.1	2.2	2.2	2.6	2.4

The food and beverages index was virtually unchanged in December. The index for food at home also was virtually unchanged. Increases in the indexes for cereal and bakery products, and for other food at home--up 0.6 and 0.2 percent, respectively--offset declines in the indexes for meats, poultry, fish, and eggs, for dairy products, for fruits and vegetables, and for nonalcoholic beverages. Despite a downturn in December, the index for dairy products registered the largest increase of the six major grocery store food groups in the last 12 months--up 13.4 percent. During the last 12 months, milk and cheese prices increased 19.3 and 13.0 percent, respectively. The index for fruits and vegetables, which declined 0.4 percent in December, increased 5.9 percent in the last 12 months, reflecting increases in prices for fresh vegetables, for fresh fruits, and for processed fruits and vegetables. The index for meats, poultry, fish, and eggs decreased 0.1 percent in December, but advanced 5.4 percent since December 2006. During the latter period, beef prices rose 5.0 percent, pork prices, 1.4 percent, and poultry prices, 6.3 percent. During the 12 months ended in December, the index for cereal and bakery products increased 5.4 percent with bread prices increasing 10.5 percent. The indexes for nonalcoholic beverages and for other food at home increased 3.5 and 3.2 percent, respectively, in all of 2007. The other two components of the food and beverages index--food away from home and alcoholic beverages--increased 0.2 and declined 0.2 percent, respectively, in December and rose 4.0 and 3.8 percent in all of 2007.

The index for housing increased 0.3 percent in December, following a 0.4 percent rise in November. The index for shelter increased 0.3 percent in December, the same as in November. Within shelter, the indexes for rent and for owners' equivalent rent increased 0.4 and 0.3 percent, respectively, and the index for lodging away from home rose 0.2 percent. During the 12 months ended in December, the indexes for rent and for owners' equivalent rent increased 4.0 and 2.8 percent, respectively, following increases of 4.3 percent in 2006. The index for lodging away from home rose 4.6 percent in 2007. The index for fuels and utilities rose 0.6 percent in December. The index for fuel oil increased 2.4 percent in December and 32.5 percent during the last 12 months. The index for natural gas rose 2.3 percent, while the index for electricity declined 0.2 percent. During the 12 months ended in December, charges for electricity rose 5.2 percent, while charges for natural gas declined 0.4 percent. The index for household furnishings and operations was virtually unchanged in December and 0.7 percent lower than in December 2006.

The transportation index increased 0.5 percent in December. The index for gasoline rose 1.1 percent, accounting for about two-thirds of the overall transportation increase. (Prior to seasonal adjustment, gasoline prices fell 1.6 percent to a level that was 3.0 percent lower than their peak level recorded in May.) During the 12 months ended in December, gasoline prices increased 29.6 percent, their largest annual advance since a 30.1 percent rise in 1999. The index for new vehicles was virtually unchanged in

December. (As of December, about 63 percent of the new car sample consisted of 2008 models. The 2008 models will continue to be phased in, with adjustments for quality change, over the next several months as they replace old models at dealerships. For a report on quality changes for the 2008 vehicles represented in the Producer Price Index sample, see news release USDL-07-1787 dated November 14, 2007.) The index for used cars and trucks rose 0.2 percent. During the last 12 months, new vehicle prices have declined 0.3 percent, while prices for used cars and trucks rose 0.5 percent. The index for public transportation increased 1.2 percent in December, largely reflecting a 1.6 percent increase in the index for airline fares. (Prior to seasonal adjustment, airline fares declined 0.9 percent in December, but advanced 10.6 percent in the last 12 months.)

The index for apparel increased 0.2 percent in December. (Prior to seasonal adjustment, apparel prices declined 2.4 percent, largely as a result of pre-holiday discounting.) During the 12 month period ended in December, apparel prices declined 0.3 percent. Declines in prices for men's and boys' apparel and women's and girls' apparel--down 1.0 and 0.7 percent, respectively--were partially offset by a 5.0 percent increase in prices for jewelry.

Medical care costs rose 0.3 percent in December. The index for medical care commodities--prescription drugs, nonprescription drugs, and medical supplies--rose 0.3 percent. The index for medical care services also rose 0.3 percent. The indexes for professional services and for hospital and related services each advanced 0.4 percent. For the 12 months ended in December, the medical care index rose 5.2 percent, its largest annual advance since a 5.4 percent increase in 1993. Charges for hospital and related services increased 8.1 percent in the 12 months ended in December, following a 6.1 percent rise in 2006.

The index for recreation was virtually unchanged in December. Decreases in the indexes for sporting goods, for photography, for toys, and for admissions to movies, theaters, concerts, and sporting events were offset by increases in the indexes for video and audio and for pets, pet products and services. During the 12 months ended in December, the index for recreation rose 0.8 percent as increases in the indexes for pets, pet products and services and for recreational services--up 5.5 and 2.4 percent, respectively--more than offset declines in the indexes for video and audio, for sporting goods, for photography, and for toys.

The index for education and communication increased 0.3 percent in December. Educational costs increased 0.5 percent while communication costs were virtually unchanged. During the 12 months ended in December, educational costs rose 5.6 percent, reflecting increases of 6.1 and 9.0 percent in the indexes for college tuition and for college textbooks, respectively. The index for communication rose 0.2 percent during the last 12 months. Increases in the indexes for telephone services and postal services--up 2.1 and 4.4 percent, respectively--offset declines in prices for personal computers and peripheral equipment, for computer software and accessories, and for internet services and electronic information providers--down 13.2, 6.4, and 5.2 percent, respectively.

The index for other goods and services increased 0.3 percent in December to a level 3.3 percent higher than in December 2006. The index for tobacco and smoking products rose 0.8 percent in December and 7.5 percent during the last 12 months, accounting for about 70 percent of the monthly increase and 45 percent of the annual change in this major group.

CPI for Urban Wage Earners and Clerical Workers (CPI-W)

On a seasonally adjusted basis, the CPI for Urban Wage Earners and Clerical Workers increased 0.3 percent in December.

CPI-U 12-Month Changes, 1997 to Present

Recalculated Seasonally Adjusted Indexes to be available on February 20, 2007

Each year with the release of the January CPI, seasonal adjustment factors are recalculated to reflect price movements from the just completed calendar year. This routine annual recalculation may result in revisions to seasonally adjusted indexes for the previous 5 years. BLS will make available recalculated seasonally adjusted indexes, as well as recalculated seasonal adjustment factors, for the period January 2003 through December 2007 on Friday February 15, 2008. This date is two working days before the scheduled release of January 2008 CPI on Wednesday February 20, 2008.

The revised indexes and seasonal factors will be available on the internet. The address is <https://www.bls.gov/cpi> Look under Tables Created by BLS and select "Revised Seasonally Adjusted Data, 2007."

For further information, please contact Jeff Wilson by electronic mail at: Wilson.Jeff@bls.gov or by telephone at: (202)691-5382.

C-CPI-U Index Revisions

As scheduled, effective with release of data for January 2008, the Chained Consumer Price Index for All Urban Consumers (C-CPI-U) will undergo its sixth annual revision. C-CPI-U indexes for the 12 months of 2006 will be issued in final form, and values for the 12 months of 2007 will be revised and issued as interim. Calculation of the preliminary versions of the C-CPI-U - the initial version for January and the subsequent months of 2008 and the interim (revised initial) indexes for 2007 - will employ the 2005-06 expenditure weights also used in the CPI-U and CPI-W. Note that the final values of the C-CPI-U employ monthly expenditure weights corresponding to the price collection period in their calculation. Thus, in calculation of the final (revised interim) C-CPI-U values for the months of 2006, the biennial 2005-2006 expenditure weights will be replaced with separate monthly expenditure weights.

REPORT ON QUALITY CHANGES FOR 2008 MODEL VEHICLES

Passenger Cars

The value of quality changes for a sample of nine 2008 model year domestically produced passenger cars included in the Producer Price Index (PPI) for October averaged \$158.04, according to estimates by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor. There was an average \$67.55 increase in manufacturers' invoice prices for this year's models as compared with last year's models. The retail equivalent value of these quality changes averaged \$170.17. Average manufacturer's suggested list prices increased \$64.12.

The \$170.17 estimated retail value of quality change breaks down as follows:

- \$82.39 for safety improvements such as changes to tire pressure monitor sensors and airbag systems;
- \$87.78 for other quality changes such as changes in audio systems and changes in levels of standard or optional equipment.

Light Trucks

The value of quality changes for a sample of twenty-one 2008 model year domestically produced light trucks included in the PPI for October averaged \$256.06. There was an average \$305.64 increase in manufacturers' invoice prices for this year's models as compared with last year's models. The retail equivalent value of quality changes for domestically produced light trucks averaged \$276.92. There was an average increase of \$342.60 in manufacturer's suggested list prices.

The \$276.92 estimated retail value of quality change breaks down as follows:

- \$126.69 for safety improvements such as stability control and airbag systems;
- \$150.23 for other quality changes such as changes to audio systems, theft protection, and changes in levels of standard or optional equipment.

Estimates of the value of quality change are based on a review by the BLS of data supplied by producers for similarly equipped 2007 and 2008 domestically produced models priced for the Producer Price Index. Most of the estimates of quality changes in this release are derived from information supplied for the Producer Price Index for October. These data also form the basis of the new vehicle quality adjustment for the Consumer Price Index (CPI). However, it should be noted that, effective with the release of data for January 1999, changes made solely for the purpose of meeting air pollution standards are no longer considered quality improvements for CPI calculation purposes.

¹ Not seasonally adjusted.

² Special index based on a substantially smaller sample.

³ Indexes on a December 1997=100 base.

⁴ Indexes on a December 2005=100 base.

⁵ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

⁶ Indexes on a December 1982=100 base.

⁷ Indexes on a December 1986=100 base.

⁸ Indexes on a December 1983=100 base.

⁹ Indexes on a December 1990=100 base.

¹⁰ Indexes on a December 2001=100 base.

¹¹ Indexes on a December 1993=100 base.

¹² Indexes on a December 1996=100 base.

¹³ Indexes on a December 1988=100 base.

¹⁴ This item will be moving to the Medical care group beginning with data for January 2008.

NA Data not adequate for publication.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ;

Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ See region and area size on Table 10 for information about cross classifications.

² Indexes on a December 1997=100 base.

³ The 'All items' index size B/C is on a December 1996=100 base.

⁴ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

⁵ Indexes on a December 1982=100 base.

⁶ Special index based on a substantially smaller sample.

⁷ Indexes on a December 1993=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1997=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ; Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Foods, fuels, and several other items priced every month in all areas; most other goods and services priced as indicated:

M - Every month.

1 - January, March, May, July, September, and November.

2 - February, April, June, August, October, and December.

² Regions defined as the four Census regions. See map in technical notes.

³ Indexes on a December 1996=100 base.

⁴ Indexes on a December 1986=100 base.

⁵ In addition, the following metropolitan areas are published semiannually and appear in Tables 34 and 39 of the January and July issues of the CPI Detailed Report: Anchorage, AK; Cincinnati-Hamilton, OH-KY-IN; Denver-Boulder-Greeley, CO; Honolulu, HI; Kansas City, MO-KS; Milwaukee-Racine, WI; Minneapolis-St. Paul, MN-WI; Phoenix-Mesa, AZ;

Pittsburgh, PA; Portland-Salem, OR-WA; St. Louis, MO-IL; San Diego, CA; Tampa-St. Petersburg-Clearwater, FL.

⁶ Indexes on a November 1996=100 base.

- Data not available.

NOTE: Local area indexes are byproducts of the national CPI program. Each local index has a smaller sample size than the national index and is, therefore, subject to substantially more sampling and other measurement error. As a result, local area indexes show greater volatility than the national index, although their long-term trends are similar. Therefore, the Bureau of Labor Statistics strongly urges users to consider adopting the national average CPI for use in their escalator clauses.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

² Indexes on a December 1984=100 base

³ Special index based on a substantially smaller sample.

⁴ Indexes on a December 1993=100 base.

⁵ Indexes on a December 1997=100 base.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Special index based on a substantially smaller sample.

² Indexes on a December 1997=100 base.

³ Indexes on a December 2005=100 base.

⁴ This index series was calculated using a Laspeyres estimator. All other item stratum index series were calculated using a geometric means estimator.

⁵ Indexes on a December 1982=100 base.

⁶ Indexes on a December 1986=100 base.

⁷ Indexes on a December 1983=100 base.

⁸ Indexes on a December 1990=100 base.

⁹ Indexes on a December 2001=100 base.

¹⁰ Indexes on a December 1993=100 base.

¹¹ Indexes on a December 1996=100 base.

¹² Indexes on a December 1988=100 base.

¹³ This item will be moving to the Medical care group beginning with data for January 2008.

NA Data not adequate for publication.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

¹ Special index based on a substantially smaller sample.

² Indexes on a December 1997=100 base.

³ Indexes on a December 2005=100 base.

⁴ This index series was calculated using a Laspeyres estimator.

All other item stratum index series were calculated using a geometric means estimator.

⁵ Indexes on a December 1982=100 base.

⁶ Indexes on a December 1986=100 base.

⁷ Indexes on a December 1983=100 base.

⁸ Indexes on a December 1990=100 base.

⁹ Indexes on a December 2001=100 base.

¹⁰ Indexes on a December 1993=100 base.

¹¹ Indexes on a December 1996=100 base.

¹² Indexes on a December 1988=100 base.

¹³ This item will be moving to the Medical care group beginning with data for January 2008.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

Energy commodities	30.0	15.0	-24.4	23.8	6.9	26.7	16.7	6.0	29.6
Services less energy services	2.6	3.3	4.1	3.5	2.5	2.7	2.8	3.6	3.3
Domestically produced farm food	1.8	3.2	3.0	.8	5.6	2.6	1.2	1.1	6.0
Utilities and public transportation	1.8	5.8	.1	1.4	3.2	3.2	9.0	.9	3.3

¹ This index series was calculated using a Laspeyres estimator.
All other item stratum index series were calculated using a geometric means estimator.

² Special index based on a substantially smaller sample.

³ Indexes on a December 2005=100 base.

⁴ This item will be moving to the Medical care group beginning with data for January 2008.

- Data not available.

NOTE: Index applies to a month as a whole, not to any specific date.

NOTE: Index applies to a month as a whole, not to any specific date.

Technical Notes

Brief Explanation of the CPI

The Consumer Price Index (CPI) is a measure of the average change in prices over time of goods and services purchased by households. The U.S. Bureau of Labor Statistics (BLS) publishes CPIs for two population groups: (1) The CPI for Urban Wage Earners and Clerical Workers (CPI-W), which covers households of wage earners and clerical workers that comprise approximately 32 percent of the total population and (2) the CPI for All Urban Consumers (CPI-U) and the Chained CPI for All Urban Consumers (C-CPI-U), which cover approximately 87 percent of the total population and include, in addition to wage earner and clerical worker households, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPIs are based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and other goods and services that people buy for day-to-day living. Prices are collected in 87 urban areas across the country from about 50,000 housing units and approximately 23,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index. Prices of fuels and a few other items are obtained every month in all 87 locations. Prices of most other commodities and services are collected every month in the three largest geographic areas and every other month in other areas. Prices of most goods and services are obtained through personal visits or telephone calls by BLS trained representatives.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. For the CPI-U and CPI-W, separate indexes also are published by size of city, by region of the country, for cross-classifications of regions and population-size classes, and for 27 local areas. Area indexes do not measure differences in the level of prices among cities; they measure only the average change in prices for each area since the base period. For the C-CPI-U, data are issued only at the national level. It is important to note that the CPI-U and CPI-W are considered final when released, but the C-CPI-U is issued in preliminary form and is subject to two annual revisions.

The index measures price change from a designated reference date. For the CPI-U and the CPI-W, the reference base is 1982–84 = 100.0. The reference base for the C-CPI-U is December 1999 = 100.0. An increase of 16.5 percent from the reference base, for example, is shown as 116.5. This change also can be expressed in dollars as follows: the price of a base-period market basket of goods and services in the CPI has risen from \$10 in 1982–84 to \$11.65.

For further details, visit the CPI homepage on the Internet at <https://www.bls.gov/cpi> or contact our CPI Information and Analysis Section at (202) 691-7000.

Calculating index changes

Movements of the indexes from one month to another usually are expressed as percent changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percent changes are not. The example shown in the box on this page illustrates the computation of index point and percent changes.

Percent changes for 3-month and 6-month periods are expressed as annual rates and are computed according to the standard formula for compound growth rates. These data indicate what the percent change would be if the current rate were maintained for a 12-month period.

Index point change

CPI	202.416
Less previous index	201.800
Equals index point change	.616

Percent change

Index point difference	.616
Divided by the previous index	201.800
Equals	0.003
Results multiplied by one hundred	0.003 x 100
Equals percent change	0.3

Regions defined

The states in the four regions are listed below.

The Northeast--Connecticut, Maine, Massachusetts, New Hampshire, New York, New Jersey, Pennsylvania, Rhode Island, and Vermont.

The Midwest--Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin.

The South--Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, West Virginia, and the District of Columbia.

The West--Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

Energy prices

Prices usually are available for the U.S. city average, 13 large metropolitan areas, the 4 census regions, 3 size classifications, and 10 areas reflecting the 4 census regions cross-classified by the 3 population sizes. However, not all energy commodities and services are used in every area of the country. Fuel oil, for example, is not a common heating fuel in some urban areas, particularly in the South and West. Where no average prices are available, the designation NA appears. This designation also appears if the data sufficiency criteria have not been met in any given month. For example, if there are fewer than five usable fuel oil prices for a published city or region size class, no fuel oil prices for the area will be published.

All prices are collected monthly by BLS representatives in the urban areas priced for the CPI. Prices for natural gas and electricity include fuel and purchased gas adjustments and all applicable taxes. Fuel oil and gasoline prices include applicable Federal, State, and local taxes.

Natural gas and electricity. Natural gas prices are reported in therms, which are a measure of heating value. Electricity prices are given in kilowatt hours (kwh). For both utility services, the consumption ranges specified in table P2 are the upper and lower limits of the bill sizes priced for the CPI. The average prices per therm and per kilowatt hour are calculated from bills priced within these ranges. It should be noted that bills priced for the CPI not only are for different consumption amounts, but may also be calculated from different types of residential rate schedules. *The average prices per therm and per kilowatt hour are not, therefore, generally suitable for use in place-to-place price comparisons.* The average prices for 40 and 100 therms of natural gas, and for 500 kilowatt hours of electricity (shown in table P1) are calculated from a special price collection program. They are not used in the calculation of the CPI. Because heating and air-conditioning requirements vary by geographic location, climate, and weather conditions, it cannot be inferred that these consumption amounts represent those used by a typical residential consumer. These bills are used merely to track price changes over time for constant amounts of consumption, and to provide continuity with prices of natural gas and electricity formerly published in conjunction with the unrevised CPI.

Fuel oil. Only #2 fuel oil (home heating oil) is priced. (See table P1.) Prices are collected, in most cases, for quantities greater than 1 gallon. These prices are converted to a gallon price for this program. Fuel oil prices reflect discounts for quantity or quick payment.

Gasoline and automotive diesel fuel. Gasoline and diesel prices, shown in table P3, are collected at the pump from a sample of full service, miniservice, and self-service gas stations. Approximate British Thermal Unit (BTU) values for some energy items are as follows, according to the source indicated:

1 therm = 100,000 BTUs (U.S. Department of Energy)

1 kwh = 3,412 BTUs (Edison Electric Institute)

1 gallon #2 fuel oil = 140,000 BTUs (U.S. Department of Energy)

Food and beverage prices

Actual weighted average prices for food and beverages are calculated each month at the national level and for the four census geographic regions, as shown in table P4. As a result of changes in price collection methodology and sample sizes, average prices for individual cities cannot, in general, be produced. It is hoped, however, that regional average prices will help to satisfy the need for local area data. It should be noted that the average prices for food in this report reflect variations in brand, quality, and size among geographic areas. Users of average food prices should be aware that these differences exist.

Because a number of food commodities are not available in all areas on a year-round basis, prices will not appear in some months for some regions or for the U.S. city average. In other instances, sufficient prices may not be available due to temporary disruptions in supplies. Where no average prices are available, the designation NA appears. When a price is not available from an individual store in any month, an estimated price will be calculated for the missing item and used in computing the average price. For cases in which the proportion of estimated prices used to calculate the average is considered too high, the average price is not published, and NA appears for that item in the table.

Because of space limitations in the table, the description for each item is abbreviated. Detailed specifications are available from BLS information offices or from the Washington office, upon request.

Seasonally adjusted and unadjusted data

Because price data are used for different purposes by different groups, the Bureau of Labor Statistics publishes seasonally adjusted as well as unadjusted changes each month.

For analyzing general price trends in the economy, seasonally adjusted changes are usually preferred since they eliminate the effect of changes that normally occur at the same time and in about the same magnitude every year—such as price movements resulting from changing climatic conditions, production cycles, model changeovers, holidays, and sales.

The unadjusted data are of primary interest to consumers concerned about the prices they actually pay. Unadjusted data also are used extensively for escalation purposes. Many collective bargaining contract agreements and pension plans, for example, tie compensation changes to the Consumer Price Index unadjusted for seasonal variation.

Seasonal factors used in computing the seasonally adjusted indexes are derived by the X-12-ARIMA Seasonal Adjustment Method. Seasonally adjusted indexes and seasonal factors are computed annually. Each year, the last 5 years of seasonally adjusted data are revised. Data from January 2002 through December 2006 were replaced in January 2007. Exceptions to the usual revision schedule were: the updated seasonal data at the end of 1977 replaced data from 1967 through 1977; and, in January 2002, dependently seasonally adjusted series were revised for January 1987–December 2001 as a result of a change in the aggregation weights for dependently adjusted series. For further information, please see “Aggregation of Dependently Adjusted Seasonally Adjusted Series,” in the October 2001 issue of the CPI Detailed Report.

The seasonal movement of All items and 54 other aggregations is derived by combining the seasonal movement of 73 selected components. Each year the seasonal status of every series is reevaluated based upon certain statistical criteria. If any of the 73 components change their seasonal adjustment status from seasonally adjusted to not seasonally adjusted, not seasonally adjusted data will be used in the aggregation of the dependent series for the last 5 years, but the seasonally adjusted indexes will be used before that period. Note: 44 of the 73 components are seasonally adjusted for 2007.

Seasonally adjusted data, including the All items index levels, are subject to revision for up to five years after their original release. For this reason, BLS advises against the use of these data in escalation agreements.

Effective with the calculation of the seasonal factors for 1990, the Bureau of Labor Statistics has used an enhanced seasonal adjustment procedure called Intervention Analysis Seasonal Adjustment for some CPI series. Intervention Analysis Seasonal Adjustment allows for better estimates of seasonally adjusted data. Extreme values and/or sharp movements which might distort the seasonal pattern are estimated and removed from the data prior to calculation of seasonal factors. Beginning with the calculation of seasonal factors for 1996, X-12-ARIMA software was used for Intervention Analysis Seasonal Adjustment.

In January 2007, BLS adjusted 37 series using Intervention Analysis Seasonal Adjustment, including selected food and beverage items, fuel oil, motor fuels, vehicles, jewelry, admission to sporting events and educational books and supplies. For example, this procedure was used for the Motor fuel series to offset the effects of damage to oil refineries from Hurricane Katrina, as well as the effects of implementing new fuel requirements in the United States.

For a complete list of Intervention Analysis Seasonal Adjustment series and explanations, please refer to the article “Intervention Analysis Seasonal Adjustment”, located on our website at: <https://www.bls.gov/cpi/cpisapage.htm>

For additional information on seasonal adjustment in the CPI, please write to the Bureau of Labor Statistics, Division of Consumer Prices and Price Indexes, Washington, DC 20212 or contact Jeff Wilson on (202) 691-6968 by e-mail at Wilson.Jeff@bls.gov. If you have general questions about the CPI, please call our information staff at (202) 691-7000.

Metropolitan areas

BLS publishes price indexes for three major metropolitan areas monthly:

Chicago-Gary-Kenosha, IL-IN-WI
Los Angeles-Riverside-Orange County, CA
New York-Northern New Jersey-Long Island,
NY-NJ-CT-PA

Data for an additional 11 metropolitan areas are published every other month [on an odd- (January, March, etc.) or even- (February, April, and so forth) month schedule] for the following areas:

Atlanta, GA	-even
Boston-Brockton-Nashua, MA-	
NH -ME-CT	-odd
Cleveland-Akron, OH	-odd
Dallas-Fort Worth, TX	-odd
Detroit-Ann Arbor-Flint, MI	-even
Houston-Galveston-Brazoria, TX	-even
Miami-Fort Lauderdale, FL	-even
Philadelphia-Wilmington	
-Atlantic City, PA-NJ-DE-MD	-even
San Francisco-Oakland	
-San Jose, CA	-even
Seattle-Tacoma-Bremerton,	
WA	-even
Washington-Baltimore,	
DC-MD-VA-WV	-odd

(Note: The designation even or odd refers to the month during which the area's price change is measured. Due to the time needed for processing, data are released 2 to 3 weeks into the following month.)

Data are published for another group of 13 metropolitan areas on a semiannual basis. These indexes, which refer to the arithmetic average for the 6-month periods from January through June and July through December, are published with release of the CPI for July and January, respectively, in August and February for

Anchorage, AK
Cincinnati-Hamilton, OH-KY-IN
Denver-Boulder-Greeley, CO
Honolulu, HI
Kansas City, MO-KS
Milwaukee-Racine, WI
Minneapolis-St. Paul, MN-WI
Phoenix-Mesa, AZ
Pittsburgh, PA
Portland-Salem, OR-WA
San Diego, CA
St. Louis, MO-IL
Tampa-St. Petersburg-Clearwater, FL

How to Obtain Consumer Price Index Information

CPI information is available from BLS electronically, through publication subscriptions, and via telephone and fax through automated recordings. Information specialists also are available in the national and information offices to provide help and to respond to questions.

Electronic access to CPI data

[BLS on the Internet](#). Through the Internet, BLS provides free, continuous access to published CPI data and press releases. The most recent month's CPI is made available immediately at the time of release. Additionally, a database called LABSTAT, containing current and historical data for the CPI, is accessible.

World Wide Web. BLS maintains a Web site at <https://www.bls.gov> on the Internet. This BLS homepage provides access to LABSTAT, as well as links to program-specific homepages. The CPI homepage <https://www.bls.gov/cpi/> provides other CPI information, as well as indexes. This includes a brief explanation of methodology, frequently asked questions and answers, contacts for further information, and explanations of how the CPI program handles special items, such as medical care and housing. In addition, CPI press releases and historical data for metropolitan areas can be accessed by linking to the regional office home pages from the main BLS Web site listed above.

Subscriptions to CPI publications

Summary data. Free, monthly, 2-page publication containing 1- and 12-month percent changes for selected U.S. city average Consumer Price Index for All Urban Consumers (CPI-U) and Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) index series. The All Items index data for each local area also are included. To be added to the mailing list, write to: Office of Publications, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 2850, Washington, DC 20212-0001, or call (202) 691-5200 or any of the BLS information offices listed next.

Recorded CPI data

Summary CPI data are provided on 24-hour recorded messages. Detailed CPI information may be obtained by calling (202) 691-5200. A touch-tone telephone is recommended, as this system allows the user to select specific indexes from lists of available data.

Recorded summaries of CPI data also may be obtained by calling any one of the metropolitan area CPI hotlines listed next. These hotline summaries typically include data for the U.S. city average, as well as for the specified area. The recordings are approximately 3 minutes in length, do not require a touch-tone telephone, and are available 24 hours a day, 7 days a week.

<i>Area</i>	<i>Hotline number</i>
Anchorage	(907) 271-2770
Atlanta	(404) 331-3415

Historical tables. These include all published indexes for each of the detailed CPI components. These tables may be obtained via the Internet, by calling (202) 691-7000 in the national office, or by contacting any of the information offices just listed.

Descriptive publications. These publications describe the CPI and ways in which to use it. They include simple factsheets discussing specific topics about the CPI, a broader, non-technical overview of the CPI in a question-and-answer format, and a technical and thorough description of the CPI and its methodology. These publications may be obtained by calling (202) 691-7000, and many are included on the CPI homepage on the Internet.

Special publications. Also available are various special publications, such as *Relative Importance of Components in the Consumer Price Index* and materials describing the annual revisions of seasonally adjusted CPI data. For more information, call (202) 691-7000.

Further information can be obtained by writing the Office of Prices and Living Conditions, Bureau of Labor Statistics, 2 Massachusetts Avenue, NE., Room 3615, Washington, DC 20212-0001, or by calling any of the information offices listed earlier.
