Fatal Workplace Injuries in 2004:

A Collection of Data and Analysis

U.S. Department of Labor
Elaine L. Chao, *Secretary*

U.S. Bureau of Labor Statistics
Phillip L. Rones, *Deputy Commissioner*

July 2007

Bulletin 2587

preface

The Census of Fatal Occupational Injuries (CFOI), administered by the Bureau of Labor Statistics (BLS, the Bureau) in conjunction with the 50 States, the District of Columbia, and New York City, compiles detailed information on all work-related fatal injuries occurring in the United States. In an effort to compile counts that are as complete as possible, the fatality census uses diverse sources to identify, verify, and profile fatal work injuries. Source documents such as death certificates, news accounts, workers' compensation reports, and Federal and State agency administrative records are cross-referenced to gather key information about each workplace fatality.

The annual CFOI report provides detailed tabulations of data from the fatality census, as well as analytical articles on various topics related to fatal workplace injuries. Although the format differs, this report for 2006 provides the same information as in previous years. The report has two sections. The first section contains charts and text highlighting fatality data from the Census of Fatal Occupational Injuries, including charts derived from five analytical articles using CFOI data. The second section, which is on compact disc, presents detailed data tables and appendices that describe the scope, methodology, and outputs of the program, along with the full text of the five analytical articles.

In addition, a second compact disc contains the Occupational Safety and Health Statistics Profiles System, which allows the user to search for data from the 2004 Census of Fatal Occupational Injuries and Survey of Occupational Injuries and Illnesses.

User-created tables and supplemental tables can be accessed on the Internet at www.bls.gov/iif. The online version of the Profiles System can be accessed at <http://data.bls.gov/GQT/servlet/InitialPage>.

Additional data are available on request from the Bureau:

This report was prepared in the Office of Compensation and Working Conditions under the administration of Associate Commissioner William Wiatrowski and under the direction of the Chief for the Division of Safety and Health Program Analysis and Control, Katharine Newman. Scott Richardson, CFOI Program Manager, supervised the preparation of the report by staff members Dino Drudi, Gregory Fayard, Samuel Meyer, Joyce Northwood, Stephen Pegula, and Peggy Suarez. Design of the report was by Keith Tapscott, and production by Edith S. Baker, both of the Office of Publications and Special Studies. Many other organizations contributed to the success of the census, including the participating State and local agencies that collected the data, the BLS regional offices that helped review and process the data, and the BLS Office of Field Operations, whose staff oversaw the census' implementation in the regions and States.

With the exception of articles reprinted from nongovernmental sources, material in this publication is in the public domain and may, with appropriate credit, be reproduced without permission. The information is available to sensory-impaired individuals upon request.
