

chart 12

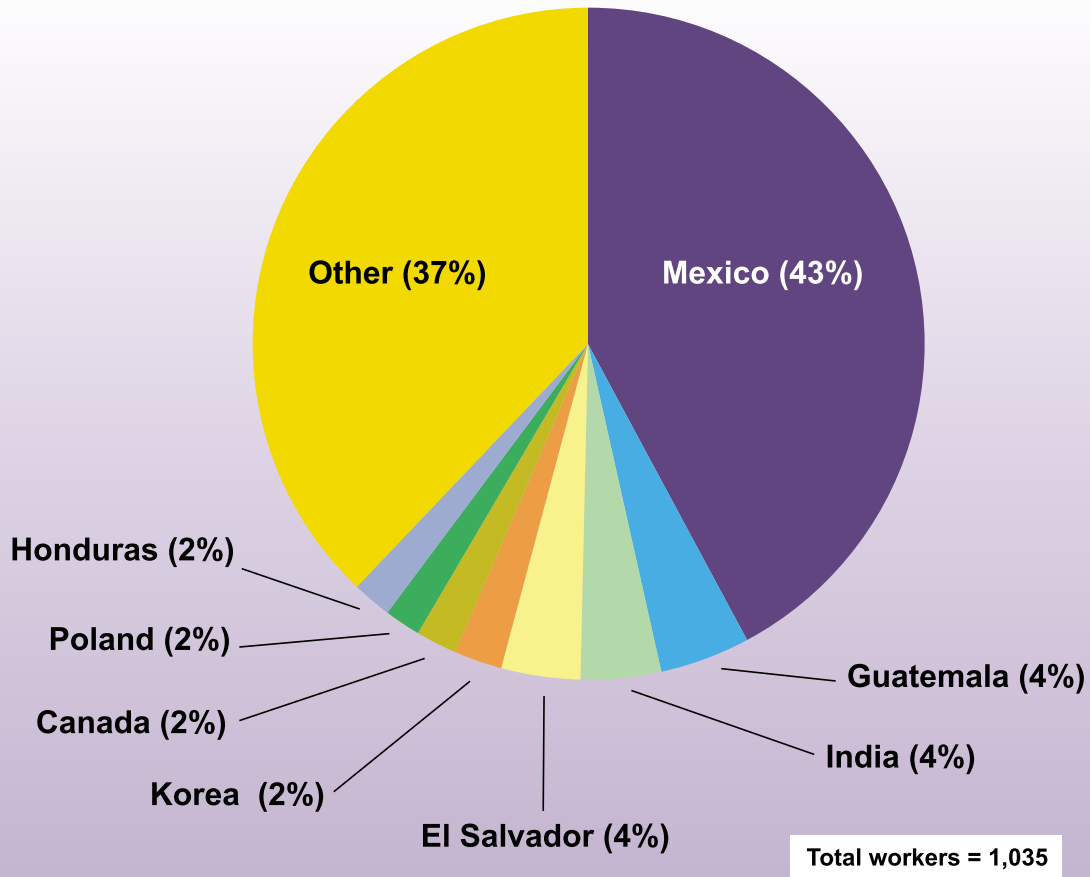

The percentage of fatal injuries involving foreign-born workers has been increasing in recent years. For example, in 2005, 18 percent of fatal work injuries involved foreign-born workers, compared with 12 percent in 1996.

The country of origin of workers killed on the job encompassed approximately 100 foreign nations in 2005. The largest portion (43 percent) of foreign-born workers who died at work in the United States was born in Mexico.

This chart reflects the 8 countries of origin with the most fatalities to foreign-born workers. Many nations are included in the “Other” category.

Fatal occupational injuries to foreign-born workers, by country of origin, 2005
