**METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT — DECEMBER 2011**

Unemployment rates were lower in December than a year earlier in 329 of the 372 metropolitan areas, higher in 36 areas, and unchanged in 7 areas, the U.S. Bureau of Labor Statistics reported today. Ten areas recorded jobless rates higher than 15.0 percent, while 24 areas registered rates of less than 5.0 percent. Two hundred thirty-nine metropolitan areas reported over-the-year increases in nonfarm payroll employment, 127 reported decreases, and 6 had no change. The national unemployment rate in December was 8.3 percent, not seasonally adjusted, down from 9.1 percent a year earlier.

**Metropolitan Area Unemployment (Not Seasonally Adjusted)**

In December, 66 metropolitan areas reported jobless rates of at least 10.0 percent, down from 110 areas a year earlier, while 125 areas posted rates below 7.0 percent, up from 71 areas in December 2010. El Centro, Calif., and Yuma, Ariz., recorded the highest unemployment rates in December 2011, 26.8 and 23.1 percent, respectively. Seven of the other eight areas with jobless rates above 15.0 percent were located in California. Bismarck, N.D., registered the lowest unemployment rate, 3.2 percent. The areas with the next lowest rates were Lincoln, Neb., and Fargo, N.D.-Minn., 3.6 and 3.7 percent, respectively. A total of 225 areas recorded December unemployment rates below the U.S. figure of 8.3 percent, 143 areas reported rates above it, and 4 areas had rates equal to that of the nation. (See table 1 and the map.)

The largest over-the-year unemployment rate decreases in December were registered in Steubenville-Weirton, Ohio-W.Va. (-2.8 percentage points), and Redding, Calif. (-2.7 points). Twenty-seven other areas recorded rate declines of 2.0 percentage points or more, and an additional 139 areas had decreases of at least 1.0 point. Two areas in Washington, Kennewick-Pasco-Richland and Yakima, reported the largest over-the-year jobless rate increases (+1.8 and +1.4 percentage points, respectively).

Of the 49 metropolitan areas with a Census 2000 population of 1 million or more, the highest unemployment rates in December were registered in Las Vegas-Paradise, Nev., 12.7 percent, and Riverside-San Bernardino-Ontario, Calif., 12.2 percent. Five additional large areas posted rates of 10.0 percent or more. The lowest jobless rates among the large areas were recorded in Minneapolis-St. Paul-Bloomington, Minn.-Wis., and Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., 5.5 percent each. Forty-six of the large areas reported over-the-year unemployment rate decreases, while three areas registered increases. Las Vegas-Paradise, Nev., experienced the largest unemployment rate decline from December 2010 (-2.4 percentage points), followed by Miami-Fort Lauderdale-Pompano Beach, Fla., and

Tampa-St. Petersburg-Clearwater, Fla. (-2.2 points each). The large area with the largest over-the-year jobless rate increase was Chicago-Joliet-Naperville, Ill.-Ind.-Wis. (+0.6 percentage point).

### **Metropolitan Division Unemployment (Not Seasonally Adjusted)**

Eleven of the most populous metropolitan areas are made up of 34 metropolitan divisions, which are essentially separately identifiable employment centers. In December 2011, Los Angeles-Long Beach-Glendale, Calif., registered the highest jobless rate among the divisions, 11.6 percent. Framingham, Mass., reported the lowest division rate, 4.8 percent, closely followed by Bethesda-Rockville-Frederick, Md., 4.9 percent. (See table 2.)

Thirty of the metropolitan divisions recorded over-the-year jobless rate decreases in December, while three divisions registered increases and one had no change. Miami-Miami Beach-Kendall, Fla., posted the largest rate decline from a year earlier (-2.8 percentage points). Eighteen other divisions reported rate decreases between 1.0 and 1.9 percentage points. Chicago-Joliet-Naperville, Ill., experienced the largest unemployment rate increase from a year earlier (+0.7 percentage point).

In 3 of the 11 metropolitan areas that contain divisions, the ranges between the highest and lowest division jobless rates were 2.0 percentage points or more in December. Boston-Cambridge-Quincy, Mass.-N.H., recorded the largest rate difference among its divisions, 5.6 percentage points (Lawrence-Methuen-Salem, Mass.-N.H., 10.4 percent, compared with Framingham, Mass., 4.8 percent).

### **Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)**

In December, 239 metropolitan areas reported over-the-year increases in nonfarm payroll employment, 127 reported decreases, and 6 had no change. The largest over-the-year employment increase occurred in Houston-Sugar Land-Baytown, Texas (+75,800), followed by New York-Northern New Jersey-Long Island, N.Y.-N.J.-Pa. (+47,900), Dallas-Fort Worth-Arlington, Texas (+45,700), and Los Angeles-Long Beach-Santa Ana, Calif. (+41,900). The largest over-the-year percentage gain in employment was reported in Columbus, Ind. (+6.4 percent), followed by Casper, Wyo. (+5.9 percent), and Blacksburg-Christiansburg-Radford, Va. (+5.2 percent). (See table 3.)

The largest over-the-year decreases in employment occurred in Philadelphia-Camden-Wilmington, Pa.-N.J.-Del.-Md. (-6,300), New Haven, Conn. (-4,100), and Montgomery, Ala. (-3,900). The largest over-the-year percentage decreases in employment were reported in Missoula, Mont. (-6.5 percent), Abilene, Texas (-5.3 percent), and Dalton, Ga. (-4.9 percent).

Over the year, nonfarm employment rose in 32 of the 36 metropolitan areas with annual average employment levels above 750,000 in 2010. The largest over-the-year percentage increases in employment in these large metropolitan areas were posted in Houston-Sugar Land-Baytown, Texas, and San Jose-Sunnyvale-Santa Clara, Calif. (+3.0 percent each), and Tampa-St. Petersburg-Clearwater, Fla. (+2.5 percent). The largest over-the-year percentage decreases in employment occurred in Cleveland-Elyria-Mentor, Ohio, Indianapolis-Carmel, Ind., and Philadelphia-Camden-Wilmington, Pa.-N.J.-Del.-Md. (-0.2 percent each).

### **Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)**

Nonfarm payroll employment data were available in December 2011 for 32 metropolitan divisions, which are essentially separately identifiable employment centers within a metropolitan area. Twenty-

four of the 32 metropolitan divisions reported over-the-year employment gains and 8 reported losses. The largest over-the-year increases in the metropolitan divisions occurred in New York-White Plains-Wayne, N.Y.-N.J. (+48,200), Seattle-Bellevue-Everett, Wash. (+36,900), and Boston-Cambridge-Quincy, Mass. (+32,100). The largest over-the-year decreases in the metropolitan divisions were in Nassau-Suffolk, N.Y. (-9,900), Bethesda-Rockville-Frederick, Md. (-5,700), and Wilmington, Del.-Md.-N.J. (-4,100). (See table 4.)

The largest over-the-year percentage increases in employment among the metropolitan divisions were reported in Framingham, Mass. (+3.0 percent), Seattle-Bellevue-Everett, Wash. (+2.7 percent), and Lowell-Billerica-Chelmsford, Mass.-N.H., and Warren-Troy-Farmington Hills, Mich. (+2.2 percent each). The largest over-the-year percentage decreases in employment occurred in Wilmington, Del.-Md.-N.J. (-1.2 percent), Bethesda-Rockville-Frederick, Md. (-1.0 percent), Nashua, N.H.-Mass. (-0.9 percent), and Nassau-Suffolk, N.Y. (-0.8 percent).

---

**The Regional and State Unemployment 2011 Annual Averages news release is scheduled to be released on Wednesday, February 29, 2012, at 10:00 a.m. (EST). The Regional and State Employment and Unemployment news release for January 2012 is scheduled to be released on Tuesday, March 13, 2012, at 10:00 a.m. (EDT). The Metropolitan Area Employment and Unemployment news release for January 2012 is scheduled to be released on Friday, March 23, 2012, at 10:00 a.m. (EDT).**

#### **Upcoming Changes to Local Area Unemployment Statistics Data**

Effective with the issuance of the Regional and State Unemployment 2011 Annual Averages news release on Wednesday, February 29, the labor force data for census regions and divisions and all states, the District of Columbia, and the seven modeled substate areas presented in tables 1 and 2 of this news release will be revised to incorporate updated inputs, new population controls, and reestimation of models. The new population controls will reflect, for the first time, results from the 2010 Census. Labor force estimates for all other metropolitan areas and metropolitan divisions subsequently will be revised to reflect updated inputs and adjustment to the new statewide estimates. Data back to 2007 are subject to revision, and the revised estimates will be published with the March 2012 Regional and State Employment and Unemployment news release on Friday, April 20.

#### **Upcoming Changes to Current Employment Statistics Data**

Effective with the release of January 2012 estimates on Tuesday, March 13, all nonfarm payroll employment estimates for states and areas presented in tables 3 and 4 of this news release will be adjusted to 2011 benchmark levels. Estimates in tables 3 and 4 from April 2010 forward will be subject to revision.

# Technical Note

This release presents labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 372 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), plus 8 areas in Puerto Rico. Estimates for 34 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for most of the same areas. State estimates were previously published in the news release, *Regional and State Employment and Unemployment*, and are republished in this release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

## Labor force and unemployment—from the LAUS program

**Definitions.** The labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. *Employed* persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. *Unemployed* persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed. The *labor force* is the sum of employed and unemployed persons. The *unemployment rate* is the number of unemployed as a percent of the labor force.

**Method of estimation.** Estimates for states, the District of Columbia, the Los Angeles-Long Beach-Glendale metropolitan division, and New York City are produced using time-series models with real-time benchmarking to national CPS totals. Model-based estimation was extended to the following areas and their respective balances of state in 2005: the Chicago-Joliet-Naperville, IL Metropolitan Division; Cleveland-Elyria-Mentor, OH Metropolitan Statistical Area; Detroit-Warren-Livonia, MI Metropolitan Statistical Area; Miami-Miami Beach-Kendall, FL Metropolitan Division; New Orleans-Metairie-Kenner, LA Metropolitan Statistical Area; and Seattle-Bellevue-Everett, WA Metropolitan Division. (Model-based estimation of the New Orleans-Metairie-Kenner metropolitan area was suspended following

Hurricane Katrina; the indirect estimation methods described below will be used for this area until further notice.) Modeling improves the statistical basis of the estimation for these areas and provides important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate areas in this release, estimates are prepared through indirect estimation procedures using a building-block approach. Employment estimates, which are based largely on “place of work” estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment insurance (UI) laws and entrants to the labor force data from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated state or balance-of-state totals. A detailed description of the estimation procedures is available from BLS upon request.

**Annual revisions.** Labor force and unemployment data shown for the prior year reflect adjustments made at the end of each year, usually implemented with January estimates. The adjusted model-based estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation. All substate estimates are reestimated and adjusted to add to the revised model-based estimates.

## Employment—from the CES program

**Definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period that includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2007 version of the North American Industry Classification System.

**Method of estimation.** The employment data are estimated using a “link relative” technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for the approximately 39 percent of CES published series which have insufficient sample for direct sample-based estimates.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports that are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to

adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

### **Reliability of the estimates**

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the particular estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding. Unemployment rates are computed from unrounded data and thus may differ slightly from rates computed using the rounded data displayed in the tables.

**Labor force and unemployment estimates.** Model-based error measures are available for states on the Internet at [www.bls.gov/lau/lastderr.htm](http://www.bls.gov/lau/lastderr.htm). Measures of nonsampling error are not available, but additional information on the subject is provided in *Employment and Earnings Online* at [www.bls.gov/opub/ee/home.htm](http://www.bls.gov/opub/ee/home.htm).

**Employment estimates.** Measures of sampling error for state CES data at the supersector level and for metro-

politan area CES data at the total nonfarm level are available online at [www.bls.gov/sae/790stderr.htm](http://www.bls.gov/sae/790stderr.htm). Information on recent benchmark revisions for states is available on the BLS Web site at [www.bls.gov/sae/](http://www.bls.gov/sae/).

### **Area definitions**

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on December 1, 2009. Data reflect New England City and Town Area (NECTA) definitions, rather than county-based definitions, in the six New England States. A detailed list of the geographic definitions is available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

### **Additional information**

More complete information on the technical procedures used to develop these estimates and additional data appear in *Employment and Earnings Online*.

Estimates of unadjusted and seasonally adjusted labor force and unemployment data for states, census regions and divisions, and seven substate areas are available in the news release, *Regional and State Employment and Unemployment*. Estimates of labor force and unemployment for all states, metropolitan areas, labor market areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available on the Internet at [www.bls.gov/lau/](http://www.bls.gov/lau/). Employment data from the CES program are available on the BLS Web site at [www.bls.gov/sae/](http://www.bls.gov/sae/).

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

<sup>1</sup> Area boundaries do not reflect official OMB definitions.

P = preliminary.

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and are available on the BLS Web site at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm). Areas in the six New England states are

Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill., is the exception in that it is listed under Illinois for operational reasons. Data for 2010 have been revised to incorporate updated inputs and adjustment to new state controls. Estimates for the latest month are subject to revision the following month.

<sup>1</sup> These 11 areas contain all of the 34 metropolitan divisions.

<sup>2</sup> Part of the area (or division) is in one or more adjacent states.

<sup>3</sup> All of the division is in one or more adjacent states.

P = preliminary.

NOTE: Data refer to place of residence. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm). Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that corresponds to the first city in their title. Metropolitan divisions

are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed. Three sets of metropolitan areas and divisions have similar or identical titles. For Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., the metropolitan area and division titles are identical. For the Boston-Cambridge-Quincy, Mass.-N.H., and Chicago-Joliet-Naperville, Ill.-Ind.-Wis., metropolitan areas, the division titles are similar but include only Massachusetts and Illinois, respectively. Data for 2010 have been revised to incorporate updated inputs and adjustment to new state controls. Estimates for the latest month are subject to revision the following month.

1 Area boundaries do not reflect official OMB definitions.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are provisional and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm). Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill. is the exception since it is listed under Illinois for operational reasons.

## ESTABLISHMENT DATA

### NOT SEASONALLY ADJUSTED

**Table 4. Employees on nonfarm payrolls by state, selected metropolitan area, and metropolitan division**

[In thousands]

State, area, and division	November		December		Change from December 2010 to December 2011 <sup>p</sup>

<sup>1</sup> Part of the area is in one or more adjacent states.

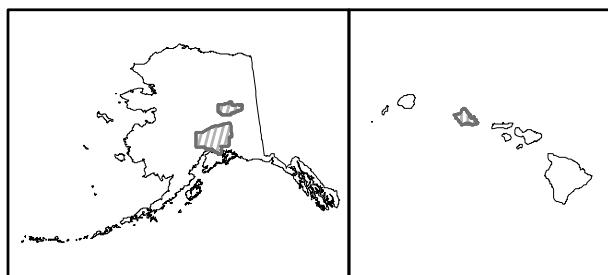

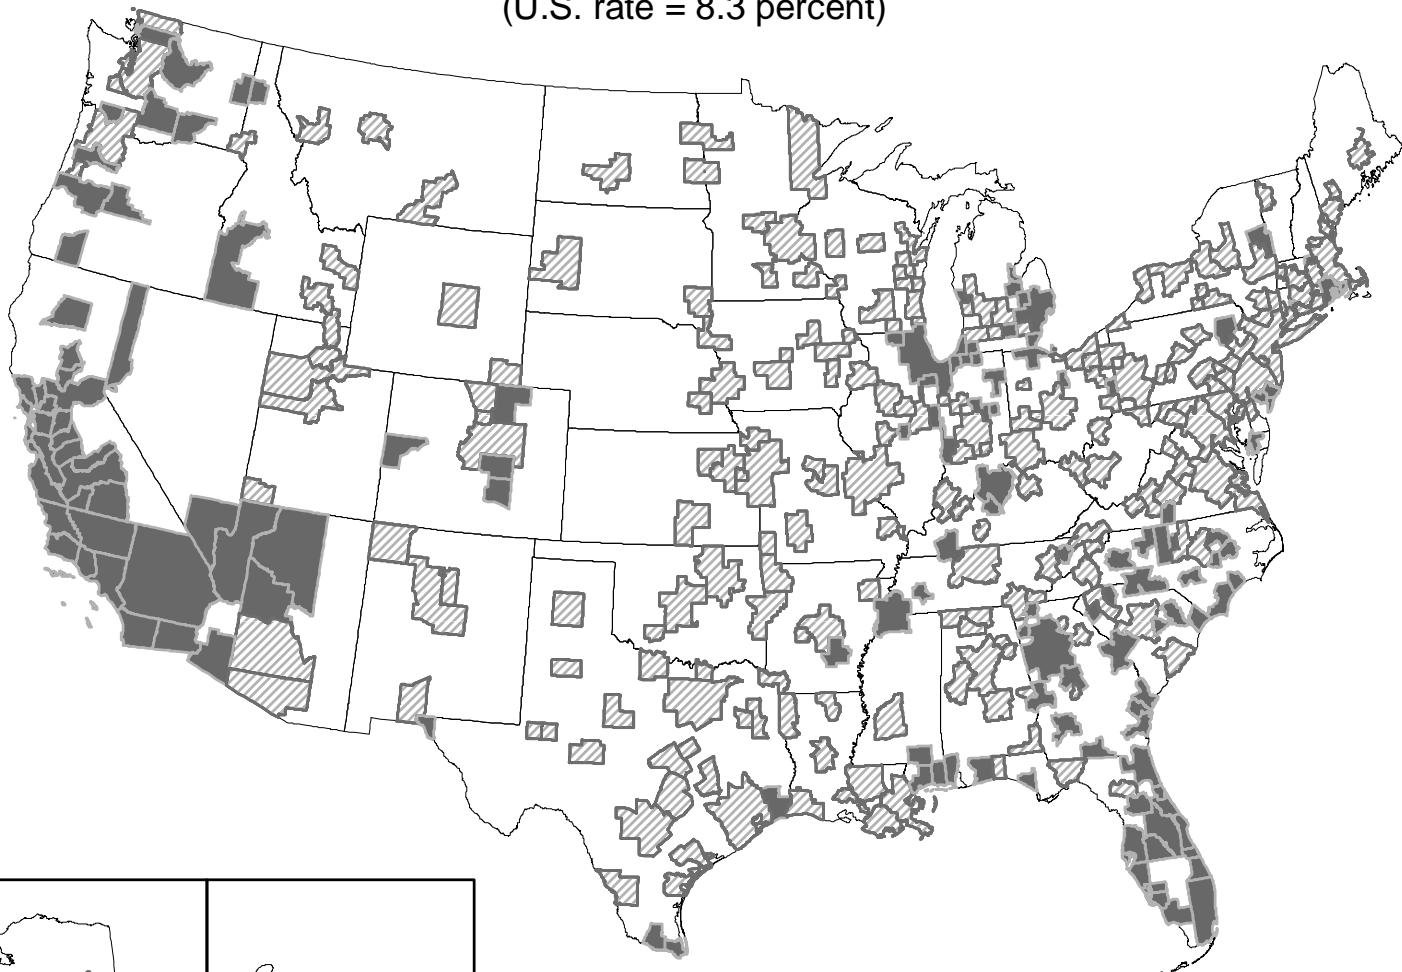

<sup>2</sup> All of the area is in one or more adjacent states.

p Preliminary

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are provisional and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 10-02, dated December 1, 2009, and available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm). Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed.

# Unemployment rates for metropolitan areas, not seasonally adjusted, December 2011

(U.S. rate = 8.3 percent)

NOTE: Map includes data for 372 metropolitan areas based on Office of Management and Budget Bulletin No. 10-02. Areas in the six New England states are Metropolitan New England City and Town areas (NECTAs), while areas in other states are county-based.
