METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT: NOVEMBER 2005

Unemployment rates were lower in November than a year earlier in 224 of the 367 metropolitan areas, higher in 118 areas, and unchanged in 25 areas, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. Eighteen metropolitan areas registered jobless rates below 3.0 percent; 13 of these were in the South. Eight areas—most of which were impacted by hurricanes—recorded rates of 10.0 percent or more. The national unemployment rate was 4.8 percent, not seasonally adjusted, down from 5.2 percent a year earlier.

Hurricane Katrina

In November, BLS and its state partners again made modifications to the usual estimation procedures for the Local Area Unemployment Statistics (LAUS) program to reflect the impact on the unemployment statistics in Katrina-affected areas. These modifications included: (1) allowing the state labor force estimates for Louisiana and Mississippi to reflect the effects of Katrina by overriding the built-in feature of the methodology that smoothes over large shifts in key inputs—unemployment insurance claims and nonfarm wage and salary employment; (2) modifying the state population controls to account for displacement due to Katrina; (3) developing labor force estimates for the New Orleans metropolitan area using an alternative to the model-based method; and (4) not publishing labor force estimates for the parishes within the New Orleans metropolitan area or cities within those parishes where the quality of input data was severely compromised by the hurricane.

For the Current Employment Statistics (CES) survey, BLS resumed normal estimation procedures in November. The procedures had been modified in September and October to account for low response rates in Katrina-affected areas. In November, the number and type of responses from the Katrina-affected areas were deemed acceptable for a return to standard procedures.

For more information on LAUS and CES procedures and estimates for November 2005, see *Hurricane Information: Katrina and Rita* on the BLS Web site at <http://www.bls.gov/katrina/home.htm> or call (202) 691-6392 for information about the LAUS program, and (202) 691-6559 for information about the CES survey.

Metropolitan Area Unemployment (Not Seasonally Adjusted)

In November, 96 metropolitan areas reported unemployment rates below 4.0 percent, up from 69 areas a year earlier, while 31 areas posted rates of at least 7.0 percent, down from 39 areas in November 2004. Fargo, N.D.-Minn., had the lowest unemployment rate, 2.3 percent. The next lowest rates were recorded in Bismarck, N.D., Fayetteville-Springdale-Rogers, Ark.-Mo., Idaho Falls, Idaho, and Winchester, Va.-W.Va., 2.5 percent each. The highest jobless rates were registered in Gulfport-Biloxi, Miss., 19.8 percent; New Orleans-Metairie-Kenner, La., 17.5 percent; El Centro, Calif., 16.3 percent; Lake Charles, La., 15.9 percent; Yuma, Ariz., 14.2 percent; Pascagoula, Miss., 13.4 percent; Houma-Bayou Cane-Thibodaux, La., 10.9 percent; and Baton Rouge, La., 10.4 percent. Six of these areas were directly affected by Hurricanes Katrina and/or Rita. Overall, 196 areas reported unemployment rates below the U.S. figure of 4.8 percent, 163 areas had higher rates, and 8 areas had the same rate. (See table 1 and the map.)

The largest over-the-year jobless rate decrease in November was posted in Vero Beach, Fla. (-3.4 percentage points). The next largest unemployment rate declines were reported in Gadsden, Ala. (-2.7 percentage points), and Visalia-Porterville, Calif. (-2.5 points). Nine other areas had rate decreases of at least 2.0 percentage points, and 55 additional areas registered declines of at least 1.0 point. The largest unemployment rate increases from last November were recorded in areas affected by Hurricanes Katrina and/or Rita—Gulfport-Biloxi, Miss. (+14.4 percentage points), New Orleans-Metairie-Kenner, La. (+12.9 points), Lake Charles, La. (+10.7 points), Pascagoula, Miss. (+7.1 points), Houma-Bayou Cane-Thibodaux, La. (+5.9 points), Baton Rouge, La. (+4.8 points), Lafayette, La. (+4.1 points), and Alexandria, La. (+3.0 points). Nine additional areas registered over-the-year unemployment rate increases of at least 1.0 percentage point.

Of the 49 metropolitan areas with a Census 2000 population of 1 million or more, the lowest jobless rates in November were reported in Birmingham-Hoover, Ala., 3.2 percent; and Orlando, Fla., and Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., 3.3 percent each. The highest rates among these large areas were recorded in New Orleans-Metairie-Kenner, La., 17.5 percent; Detroit-Warren-Livonia, Mich., 6.8 percent; and Memphis, Tenn.-Miss.-Ark., 6.2 percent. Thirty large areas reported lower unemployment rates than in November 2004, 12 registered higher rates, and 7 had no change. The largest over-the-year rate decreases were posted in Birmingham-Hoover, Ala. (-1.5 percentage points), and Portland-Vancouver-Beaverton, Ore.-Wash. (-1.2 points). Four additional large areas registered jobless rate declines of at least 1.0 percentage point. New Orleans-Metairie-Kenner, La., again recorded the largest over-the-year unemployment rate increase (+12.9 percentage points). The next largest rate increase was reported in Louisville, Ky.-Ind. (+1.4 percentage points). No other large area had a rate increase greater than 0.7 percentage point.

Metropolitan Division Unemployment (Not Seasonally Adjusted)

Eleven of the most populous metropolitan areas are composed of 34 metropolitan divisions, which are essentially separately identifiable employment centers. The lowest unemployment rates in November were posted in the two divisions that make up the Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., metropolitan area—Bethesda-Frederick-Gaithersburg, Md., 3.1 percent, and Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., 3.3 percent. Six additional divisions registered rates below 4.0 percent. The highest unemployment rates among the divisions continued to be reported in Detroit-Livonia-Dearborn, Mich., 8.1 percent, and Lawrence-Methuen-Salem, Mass.-N.H., 7.0 percent. (See table 2.)

Eighteen of the 34 metropolitan divisions recorded over-the-year unemployment rate decreases in November, 13 had rate increases, and 3 had rates that were unchanged from those of November 2004. The largest jobless rate declines were registered in Los Angeles-Long Beach-Glendale, Calif. (-1.3 per-

centage points), Miami-Miami Beach-Kendall, Fla. (-1.2 points), West Palm Beach-Boca Raton-Boynton Beach, Fla. (-1.1 points), and Lake County-Kenosha County, Ill.-Wis. (-1.0 point). Though 13 divisions recorded jobless rate increases from a year earlier, none was greater than 0.3 percentage point.

In 6 of the 11 metropolitan areas that contain divisions, the ranges between the highest and lowest division unemployment rates were 1.0 percentage point or more in November. The metropolitan areas that had the widest rate ranges between their divisions were Boston-Cambridge-Quincy, Mass.-N.H. (Lawrence-Methuen-Salem, Mass.-N.H., 7.0 percent, compared with Framingham, Mass., 3.6 percent), and Detroit-Warren-Livonia, Mich. (Detroit-Livonia-Dearborn, 8.1 percent, compared with Warren-Farmington Hills-Troy, 5.8 percent).

Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)

In November 2005, 304 metropolitan areas recorded over-the-year increases in nonfarm payroll employment, 56 reported decreases, and 7 had no change. The largest over-the-year employment gains were posted in Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+86,900), Phoenix-Mesa-Scottsdale, Ariz. (+69,700), New York-Northern New Jersey-Long Island, N.Y.-N.J.-Pa. (+61,500), Las Vegas-Paradise, Nev. (+61,000), Miami-Fort Lauderdale-Miami Beach, Fla. (+59,300), and Seattle-Tacoma-Bellevue, Wash. (+57,100). The largest percentage increases in employment were reported in El Centro, Calif., and St. George, Utah (+8.5 percent each), Coeur d'Alene, Idaho (+8.0 percent), Las Vegas-Paradise, Nev. (+7.3 percent), and Yuba City, Calif. (+6.7 percent). Large over-the-year decreases in employment in New Orleans-Metairie-Kenner, La. (-207,600), and Gulfport-Biloxi, Miss. (-22,600), reflect the impact of Hurricane Katrina, which struck the Gulf Coast in late August. The largest over-the-year percentage declines in employment were reported in New Orleans-Metairie-Kenner, La. (-33.4 percent), Gulfport-Biloxi, Miss. (-19.9 percent), Holland-Grand Haven, Mich. (-3.9 percent), and Beaumont-Port Arthur, Texas (-2.9 percent).

Over the year, nonfarm employment rose in 32 of the 35 metropolitan areas with annual average employment levels above 750,000 in 2004. The largest over-the-year percentage increases in employment in these large metropolitan areas occurred in Las Vegas-Paradise, Nev. (+7.3 percent), Orlando, Fla. (+4.1 percent), Phoenix-Mesa-Scottsdale, Ariz. (+4.0 percent), and Seattle-Tacoma-Bellevue, Wash. (+3.5 percent). Among the largest areas, the only over-the-year percentage decreases in employment were recorded in Detroit-Warren-Livonia, Mich. (-0.8 percent), Cleveland-Elyria-Mentor, Ohio (-0.2 percent), and Pittsburgh, Pa. (-0.1 percent).

Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)

Nonfarm payroll employment data were available in November 2005 for 32 metropolitan divisions, which are essentially separately identifiable employment centers within a metropolitan area. Twenty-nine of the 32 metropolitan divisions reported over-the-year employment increases, while 3 reported decreases. The largest over-the-year increase in the metropolitan divisions occurred in Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+72,200), followed by Seattle-Bellevue-Everett, Wash. (+49,200), New York-Wayne-White Plains, N.Y.-N.J. (+46,600), and Chicago-Naperville-Joliet, Ill. (+45,400). Over-the-year employment losses were recorded in Detroit-Livonia-Dearborn, Mich. (-11,500), Newark-Union, N.J.-Pa. (-6,600), and Warren-Farmington Hills-Troy, Mich. (-5,900).

The largest over-the-year percentage increases in employment among the metropolitan divisions were reported in Fort Lauderdale-Pompano Beach-Deerfield Beach, Fla. (+3.8 percent), Seattle-Bellevue-Everett, Wash. (+3.6 percent), Tacoma, Wash., and Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+3.1 percent each), and West Palm Beach-Boca Raton-Boynton Beach, Fla. (+2.8 percent). Over-the-year

percentage decreases in employment among the divisions were reported for Detroit-Livonia-Dearborn, Mich. (-1.4 percent), Newark-Union, N.J.-Pa. (-0.6 percent), and Warren-Farmington Hills-Troy, Mich. (-0.5 percent).

The Regional and State Employment and Unemployment release for December is scheduled to be issued on January 24, 2006. The Metropolitan Area Employment and Unemployment release for December is scheduled to be issued on February 1, 2006. The reference months and release dates for the Metropolitan Area Employment and Unemployment release for the balance of 2006 are as follows:

Jan.–March 17	April–May 31	July–Aug. 30	Oct.–Nov. 29
Feb.–April 5	May–June 28	Aug.–Sept. 27	
March–May 3	June–Aug. 2	Sept.–Nov. 1	

Technical Note

This release presents labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 375 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), including those in Puerto Rico. Estimates for over 30 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for the same areas. State estimates were previously published in the news release, *Regional and State Employment and Unemployment*, and are republished in this release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

Labor force and unemployment—from the LAUS program

Definitions. The labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The labor force includes both the employed and the unemployed. Employed persons are those who did any work at all for pay or profit in the survey reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who have a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. Unemployed persons are those who did not work at all (in the reference week), have actively looked for a job (sometime in the 4-week period ending with the survey reference week), and are currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed.

Method of estimation. Effective January 2005, estimates for all census divisions, states, the District of Columbia, the Los Angeles-Long-Beach-Glendale metropolitan division, and New York City were produced using updated time-series models with real-time benchmarking. Model-based estimation was extended to the following areas and respective balances-of-state: Chicago-Naperville-Joliet, IL Metropolitan Division; Cleveland-Elyria-Mentor, OH Metropolitan Statistical Area; Detroit-Warren-Livonia, MI Metropolitan Statistical Area; Miami-Miami-Beach-Kendall, FL Metropolitan Division; New Orleans-Mataire-Kenner, LA Metropolitan Statistical Area; and Seattle-Bellevue-Everett, WA Metropolitan Division. This will improve the statistical basis of the estimation for these areas and provide important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate areas, estimates are prepared through indirect estimation procedures. Employment estimates, which are based largely on “place of work” estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment (UI) laws and entrants to the labor force data from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated state or balance-of-state totals. A detailed description of the estimation procedures is available from BLS upon request.

Annual revisions. Labor force and unemployment data shown for the prior year reflect adjustments made at the end of each year, usually implemented with January estimates. The adjusted estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation at the state and selected area level. All substate estimates are adjusted to add to the revised model-based estimates.

Employment—from the CES program

Definitions. Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2002 version of the North American Industry Classification System.

Method of estimation. The employment data are estimated using a “link relative” technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for the approximately 10 percent of CES published series which have insufficient sample for direct sample-based estimates.

Annual revisions. Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports which are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

Reliability of the estimates

The estimates presented in this release are based on sample survey and administrative data and thus are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data are also subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the special estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding. With respect to the LAUS program, unemployment rates are computed from unrounded data rather than from data that may be displayed in the tables; differences, however, are generally insignificant.

Labor force and unemployment estimates. Model-based error measures, including for over-the-month change, are available for states on the BLS Web site at <http://www.bls.gov/lau/lastderr.htm>. Measures of nonsampling error are not available, but additional information on the subject is provided in the BLS monthly periodical, *Employment and Earnings*.

Employment estimates. Measures of sampling error for state CES data at the supersector level and for metropolitan area CES data at the total nonfarm level are available on the BLS Web site at <http://www.bls.gov/sae/790stderr.htm>. Information on recent benchmark revisions for states is available at <http://www.bls.gov/sae>.

Area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on February 18, 2004. A detailed list of the geographic definitions is available on the Web at <http://www.bls.gov/lau/lausmsa.htm> and also is published annually in the May issue of *Employment and Earnings*.

Additional information

More complete information on the technical procedures used to develop these estimates and additional data appear in *Employment and Earnings*, which is available by subscription from the Super-

intendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (telephone 202-512-1800).

Estimates of unadjusted and seasonally adjusted labor force and unemployment data for states, census regions and divisions, and eight areas are available in the news release, *Regional and State Employment and Unemployment*. Estimates of labor force and unemployment for all states, metropolitan areas, labor market areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available on the BLS Web site at <http://www.bls.gov/lau>. Employment data from the CES program are available at <http://www.bls.gov/sae/>.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; TDD message referral phone: 1-800-877-8339.

P = preliminary.

- Data not available.

¹ Estimates are not model-based as of September 2005.

² Area boundaries do not reflect official OMB definitions.

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area definitions are based on Office of Management and Budget Bulletin No. 04-03, dated February 18, 2004, and are available at <http://www.bls.gov/lau/lausmsa.htm> and in the May issue of *Employment and Earnings*. Areas in the

six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill., and Weirton-Steubenville, W.Va-Ohio, are the exceptions in that they are listed under Illinois and Ohio, respectively, for operational reasons. Estimates for the latest month are revised the following month, and at least 3 years of estimates are subject to revision at the end of the year, to incorporate updated inputs and reestimation.

Table 2. Civilian labor force and unemployment by state, selected metropolitan area, and metropolitan division¹

^p = preliminary.

¹ These 11 areas contain all of the 34 metropolitan divisions.

² Part of the area (or division) is in one or more adjacent states.

³ All of the division is in one or more adjacent states.

NOTE: Data refer to place of residence. Area definitions are based on Office of Management and Budget Bulletin No. 04-03, dated February 18, 2004, and are available at <http://www.bls.gov/lau/lausma.htm> and in the May issue of *Employment and Earnings*. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed

under the state that corresponds to the first city in their title. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed. Estimates for the latest month are revised the following month, and at least 3 years of estimates are subject to revision at the end of the year, to incorporate updated inputs and reestimation. Two sets of metropolitan areas and divisions have similar or identical titles. For Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., the titles are identical. For the Chicago-Naperville-Joliet, Ill.-Ind.-Wis. metropolitan area, the division title includes only Illinois.

¹ Area boundaries do not reflect official OMB definitions.

^P = preliminary.

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are provisional and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 04-03, dated February 18, 2004, and are available at <http://www.bls.gov/lau/lausmsa.htm> and

in the May issue of *Employment and Earnings*. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill., and Weirton-Steubenville, W. Va.-Ohio, are the exceptions in that they are listed under Illinois and Ohio, respectively, for operational reasons.
