# Women in the Labor Force: A Databook

#### Introduction

major development in the American workforce has been the increased labor force participation of women. In 1970, only about 43 percent of women age 16 and older were in the labor force; by 1999, that figure had risen to 60 percent. From 1999 to 2004, women's labor force participation rate receded slightly to 59.2 percent, still well above the rates that prevailed throughout the 1970s, 1980s, and much of the 1990s. Along with rising labor force participation, women also made substantial inroads into higher paying occupations. In 2004, half of all management, professional, and related occupations were held by women. Women's earnings relative to men's also have risen. From 1979 to 2004, women's earnings as a percent of men's increased by 18 percentage points, from 62 to 80 percent. The movement of women into the labor force and into higher paying occupations has gone hand in hand with their pursuit of higher education. For example, in 1970, only 11 percent of women age 25 to 64 had completed 4 or more years of college; by 2004, nearly 33 percent held a college degree.

This report presents historical and current labor force and earnings data for women and men from the Current Population Survey (CPS). The CPS is a national monthly survey of approximately 60,000 households conducted by the U.S. Census Bureau for the Bureau of Labor Statistics. Unless otherwise noted, data are annual averages from the CPS. For a detailed description of the source of the data and an explanation of concepts and definitions used, see the Technical Note at the end of this report.

### **Highlights**

- In 2004, about 59 percent of women were in the labor force. Although the unemployment rate for women rose from 4.1 percent in 2000 to 5.4 percent in 2004, it remained relatively low by historical standards. The unemployment rates for white and Asian women were much lower than those of their black and Hispanic counterparts. (See tables 1, 2, and 3.)
- Since the early 1980s, women's and men's unemployment rates have been roughly similar. In 2000, the jobless rates for women and men were 4.1 and 3.9 percent, respectively.

Both figures were the lowest in 30 years. From 2000 to 2003, unemployment rates for both sexes rose but then declined in 2004. (See table 2.)

- From 1975 to 2000, the labor force participation rate of mothers with children under age 18 rose from 47 to 73 percent. From 2000 to 2004, the rate receded slightly to 71 percent. Mothers with older children (6 to 17 years of age) are more likely to participate in the labor force than are mothers of younger children (under 6 years of age). Unmarried mothers have higher participation rates than do married mothers. (See tables 6 and 7.)
- The educational attainment level of women age 25 to 64 rose substantially from 1970 to 2004. About 3 in 10 women in the labor force held college degrees in 2004, compared with about 1 in 10 in 1970. About 8 percent of women in the labor force were high school dropouts in 2004, compared with 34 percent in 1970. (See table 9.) Data from 1970 were from the March supplement to the CPS.
- Women held half of all management, professional, and related occupations in 2004. However, women's share of specific occupations within this broad category varied. For example, only 14 percent of architects and engineers and 29 percent of physicians and surgeons were women. In contrast, 86 percent of paralegals and legal assistants and 89 percent of dieticians and nutritionists were women. (See table 11.)
- Employed Asian women were more likely than employed white, black, or Hispanic women to work in management, professional, and related occupations (about 44 percent compared with 39, 31, and 22 percent, respectively). Hispanic and black women (30 and 27 percent, respectively) were more likely than white or Asian women (19 percent each) to work in service occupations. (See table 12.)
- In 2004, women accounted for more than half of all workers in each of the following industries: Financial activities, education and health services, and leisure and hospitality. Women were underrepresented (relative to their share of total employment) in mining, construction, and transportation and utilities. (See table 14.)

- In 2004, women who worked full time had median weekly earnings of \$573. Asian and white women earned more than their black and Hispanic counterparts (\$613 and \$584 compared with \$505 and \$419). In 2004, women's median weekly earnings were 80 percent of men's. Women's-tomen's earnings ratios were higher among black and Hispanic workers (89 and 87 percent, respectively) than among white and Asian workers (80 and 76 percent, respectively). (See table 16.) (Users should note that the comparisons of earnings in this report are made on a broad level and do not control for many factors that can be significant in explaining earnings differences.)
- Female college graduates age 25 and over earned about 76 percent more than women with only a high school diploma in 2004. This difference in earnings by education has increased sharply since 1979, when female college graduates earned 43 percent more than female high school graduates. Nonetheless, female college graduates who were full-time wage and salary workers had median weekly earnings that were only 75 percent of those of their male counterparts in 2004, \$860 versus \$1,143. (See table 17.)
- In 2004, approximately 26 percent of employed women usually worked part time, compared with about 11 percent of employed men. Over the past 35 years, the proportion of women who worked part time has changed little, and the proportion for men has edged up slightly. (See table 20.) (Part-time workers are defined as those who usually work less than 35 hours a week.)
- From 1976 to 2004, women in nonagricultural industries increased their average workweek by about 2 hours to 35.9 hours. Men's average workweek remained relatively unchanged over the same period and was 41.6 hours in 2004. (See table 21.)
- Nearly 60 percent of all women who worked at some time in calendar year 2003 worked full time and year round, compared with 41 percent in 1970. During the same period, the proportion of men who worked full time and year round grew from 66 to 73 percent. (See table 22.) These data were collected in the Annual Social and Economic Supplement to the CPS and refer to work experience during the prior calendar year.
- Both wife and husband had earnings from work in 58 percent of married-couple families in 2003, compared with 44 percent in 1967. (See table 23.) These data were collected in the Annual Social and Economic Supplement to the CPS and reflect earnings and work experience of the prior calendar year.
- Working wives' contributions to family income grew by about 9 percentage points between 1973 and 2003. In

- 1973, wives' earnings accounted for 26 percent (median) of their families' incomes; by 2003, that share had grown to 35 percent. The proportion of wives earning more than their husbands also grew. In 1987, 18 percent of working wives whose husbands also worked earned more than their spouses; in 2003, this proportion was 25 percent. (See tables 24 and 25.) These data were collected in the Annual Social and Economic Supplement to the CPS and reflect earnings and work experience of the prior calendar year.
- In 2004, about 1.3 million female workers paid at an hourly rate had earnings at or below the Federal minimum wage of \$5.15 an hour; nearly half of these women were age 16 to 24. Among workers age 25 years and over who were paid hourly rates, about 2 percent of women had earnings at or below the minimum wage, twice the rate for men. (See table 26.)
- Women who were in the labor force for 27 weeks or more in 2003 were slightly more likely than men to live in poverty; 6.0 percent of women were in poverty versus 4.7 percent of men. Moreover, among those who worked or looked for work for 27 weeks or more, black and Hispanic women were more than twice as likely as white and Asian women to live below the poverty level. Poverty rates generally decline with age; among those in the labor force for 27 weeks or more, about 1 in 10 women between the ages of 16 and 24 lived below the poverty level in 2003, compared with about 1 in 20 women age 25 and older. (See table 27.) Data are from the Annual Social and Economic Supplement to the CPS and reflect earnings and work experience of the prior calendar year.
- Men were slightly more likely than women to have flexible schedules on their jobs in May 2001, and white women were more likely to have flexible schedules than either black or Hispanic women. Unmarried women were more likely to have flexible schedules on their jobs than married women, although the reverse was true for men. (See table 30.) Data are from the May 2001 Work Schedules supplement to the CPS.
- About 15 percent of both women and men reported working at home at least once per week as part of their main job in May 2001. Working at home was more common for parents than for nonparents. Women were slightly more likely than men were to be paid for work they did at home. Self-employment was fairly common among those who worked at home in May 2001: about 27 percent of women who worked at home were self-employed; the comparable figure for men was 33 percent. (See table 31.) Data are from the May 2001 Work Schedules supplement to the CPS.

- About 2.3 million women and 3.0 million men experienced
  job displacement between January 2001 and December
  2003. Women who were displaced were roughly twice as
  likely as men to have left the labor force by January 2004
  (20 percent versus 12 percent). (See table 32.) Data are
  from the January 2004 Displaced Worker supplement to
  the CPS.
- In 2004, among recent high school graduates, young women were more likely than young men to enter college (72 percent versus 61 percent). (For information on the labor force status of recent high school graduates and dropouts by school enrollment and sex, see table 33.)
   Data are from the October 2004 School Enrollment supplement to the CPS.
- Almost 48 percent of women age 16 to 24 who were enrolled in either high school or college in October 2004 were in the labor force. This is slightly above the labor force participation rate of men enrolled in school. Young women not in school were less likely than their male counterparts to be in the labor force (73 percent versus 87 percent). Among young women who were not in school, labor force participation rates were dramatically lower and unemployment rates four times higher for those who had not completed high school than for those who had graduated from college. (See table 34.) Data are from the October 2004 School Enrollment supplement to the CPS.

- In 1970, 2.2 percent of employed women were multiple jobholders, but by 1995, the rate had nearly tripled to 6.5 percent. Subsequently, the multiple jobholding rate for women trended downward, falling to 5.6 percent by 2004. The multiple jobholding rate for men also has declined in recent years, from 6.3 percent in 1998 to 4.9 percent in 2004. (See table 35.) Data were collected in the May CPS.
- In 2004, 5.6 percent of employed women were self-employed compared with 8.0 percent of men. During the 1976-2004 period, the percentage of women who were self-employed increased by 1.2 percentage points, while the percentage of men who were self-employed edged down by less than half a percentage point. In 2004, women made up about 38 percent of self-employed persons, compared with nearly 27 percent in 1976. (See table 36.)
- In 2003, foreign-born women (54 percent) were less likely to be in the labor force than native-born women (60 percent). The reverse was true for men. (See table 37.)
- Thirteen percent of female wage and salary workers were represented by unions in 2004, compared with 15 percent of men. Union attachment for both groups has fallen since 1983, when unions represented 18 percent of female wage and salary workers and nearly 28 percent of men. (See table 38.)

NOTE: Children are "own children" and include sons, daughters, stepchildren, and adopted children. Not included are nieces, nephews, grandchildren, and other related and unrelated children. Estimates for the above race groups (white, black or African Ameri-

can, and Asian) do not sum to totals because data are not presented for all races. In addition, persons whose ethnicity is identified as Hispanic or Latino may be of any race and, therefore, are classified by ethnicity as well as by race.

<sup>&</sup>lt;sup>1</sup> Includes never-married, divorced, separated, and widowed.

NOTE: Children are "own children" and include sons, daughters, stepchildren, and adopted children. Not included are nieces, nephews, grandchildren, and other related and unrelated children. Detail

for the above race groups (white, black or African American, and Asian) do not sum to totals because data are not presented for all races. In addition, persons whose ethnicity is identified as Hispanic or Latino may be of any race and, therefore, are classified by ethnicity as well as by race.

NOTE: "Own children" include sons, daughters, stepchildren, and adopted children. Not included are nieces, nephews, grandchildren, and other related and unrelated children. Data for 1994 and subsequent years are not directly comparable with data for 1993 and earlier years because of a major redesign of the Current Population Survey.

<sup>&</sup>lt;sup>1</sup> Data from 1970-1991 are based on the March Current Population Survey.

<sup>&</sup>lt;sup>2</sup> Includes persons with a high school diploma or equivalent.
<sup>3</sup> Includes persons with bachelor's, master's, professional, and doctoral degrees.

<sup>&</sup>lt;sup>4</sup> Beginning in 1992, data on educational attainment are annual averages and are based on the "highest diploma or degree received" rather than the "number of years of school completed."

Transportation attendants		71.4
Child care workers	1	94.5
Personal and home care aides		87.6
Recreation and fitness workers	314	64.9
ales and office occupations		63.9
Sales and related occupations		49.3
First-line supervisors/managers of retail sales workers		43.0
First-line supervisors/managers of non-retail sales workers		28.7
Cashiers	,-	76.
Counter and rental clerks		55.2
Parts salespersons	. 147	12.4
Retail salespersons		50.8
Advertising sales agents	. 211	49.2
Insurance sales agents	. 508	44.7
Securities, commodities, and financial services sales agents	. 382	28.5
Travel agents	. 95	82.0
Sales representatives, services, all other		39.4
Sales representatives, wholesale and manufacturing	1,416	25.5
Models, demonstrators, and product promoters	. 68	86.4
Real estate brokers and sales agents	. 912	54.5
Telemarketers	180	63.8
Door-to-door sales workers, news and street vendors, and related workers	312	63.6
Sales and related workers, all other	. 260	60.3
Office and administrative support occupations	. 19,481	75.9
First-line supervisors/managers of office and administrative support workers	. 1,631	71.4
Switchboard operators, including answering service	. 66	86.5
Telephone operators	. 56	81.6
Bill and account collectors		70.2
Billing and posting clerks and machine operators		91.6
Bookkeeping, accounting, and auditing clerks		91.8
Payroll and timekeeping clerks		91.9
Tellers		88.1
Court, municipal, and license clerks		88.2
Credit authorizers, checkers, and clerks		75.0
Customer service representatives		71.1

Table 11. Employed persons by detailed occupation and sex, 2004 annual averages —Continued

Occupation	Total employed	Percent women
Eligibility interviewers, government programs	66	76.5
File clerks		79.8
Hotel, motel, and resort desk clerks		75.3
Interviewers, except eligibility and loan		84.7
Library assistants, clerical		83.2
Loan interviewers and clerks		82.9
Order clerks		71.9
Human resources assistants, except payroll and timekeeping		80.6
Receptionists and information clerks	1	92.4
Reservation and transportation ticket agents and travel clerks		65.7
Couriers and messengers		14.8
· ·		_
Dispatchers		55.6
Postal service clerks		48.0
Postal service mail carriers		37.1
Postal service mail sorters, processors, and processing machine operators	1	43.2
Production, planning, and expediting clerks	1	53.1
Shipping, receiving, and traffic clerks		28.1
Stock clerks and order fillers	1	37.4
Weighers, measurers, checkers, and samplers, recordkeeping	1	46.5
Secretaries and administrative assistants	1	96.9
Computer operators		55.1
Data entry keyers		80.3
Word processors and typists		93.5
Insurance claims and policy processing clerks		87.2
Mail clerks and mail machine operators, except postal service	. 154	52.2
Office clerks, general	1	83.5
Office machine operators, except computer	61	56.9
Natural resources, construction, and maintenance occupations	14,582	4.5
Farming, fishing, and forestry occupations	. 991	20.6
First-line supervisors/managers of farming, fishing, and forestry workers	59	11.3
Graders and sorters, agricultural products	. 68	76.4
Logging workers	92	2.9
Construction and extraction occupations	8,522	2.5
First-line supervisors/managers of construction trades and extraction workers	. 887	2.2
Brickmasons, blockmasons, and stonemasons	239	.9
Carpenters	1,764	1.8
Carpet, floor, and tile installers and finishers	268	1.9
Cement masons, concrete finishers, and terrazzo workers	. 115	.2
Construction laborers	1	3.2
Operating engineers and other construction equipment operators	367	1.0
Drywall installers, ceiling tile installers, and tapers		1.1
Electricians		2.1
Painters, construction and maintenance	719	5.8
Pipelayers, plumbers, pipefitters, and steamfitters		.9
Roofers		1.3
Sheet metal workers		4.0
Structural iron and steel workers	1	.8
Helpers, construction trades		5.3
Construction and building inspectors		12.4
Highway maintenance workers		2.7
Tighta, maintonano nomoro	90	2.7

Table 11. Employed persons by detailed occupation and sex, 2004 annual averages—Continued

Occupation	Total employed	Percent women
Installation, maintenance, and repair occupations	5,069	4.6
First-line supervisors/managers of mechanics, installers, and repairers		7.1
Computer, automated teller, and office machine repairers		12.0
Radio and telecommunications equipment installers and repairers		13.6
Electric motor, power tool, and related repairers		3.2
Security and fire alarm systems installers		3.9
Aircraft mechanics and service technicians		3.4
Automotive body and related repairers		2.4
Automotive service technicians and mechanics		1.3
Bus and truck mechanics and diesel engine specialists		.6
Heavy vehicle and mobile equipment service technicians and mechanics		.3
Small engine mechanics		.7
Heating, air conditioning, and refrigeration mechanics and installers		1.5
Industrial and refractory machinery mechanics		3.7
Maintenance and repair workers, general		4.1
Millwrights		3.1
Electrical power-line installers and repairers		1.1
Telecommunications line installers and repairers		4.8
Precision instrument and equipment repairers		20.0
Coin, vending, and amusement machine servicers and repairers		16.5
Production, transportation, and material moving occupations	. 17,954	23.0
Production occupations	9,462	30.4
First-line supervisors/managers of production and operating workers	. 921	20.1
Electrical, electronics, and electromechanical assemblers	226	54.9
Bakers		45.6
Butchers and other meat, poultry, and fish processing workers	304	19.6
Food batchmakers	. 85	52.5
Cutting, punching, and press machine setters, operators, and tenders, metal and plastic	. 139	28.4
Grinding, lapping, polishing, and buffing machine tool setters, operators, and tenders, metal and plastic	74	11.0
Machinists		4.4
Molders and molding machine setters, operators, and tenders, metal and plastic		24.9
Tool and die makers		3.0
Welding, soldering, and brazing workers		5.0
Job printers		21.2
Prepress technicians and workers		51.2
Printing machine operators		19.3
Laundry and dry-cleaning workers		60.0
Pressers, textile, garment, and related materials		66.0
		77.7
Sewing machine operators		69.9
Cabinetmakers and bench carpenters		4.4
Stationary engineers and boiler operators		1.0
Water and liquid waste treatment plant and system operators		6.1
Chemical processing machine setters, operators, and tenders		14.0
Crushing, grinding, polishing, mixing, and blending workers		20.1
Citisting, grinding, polisting, mixing, and blending workers		25.6
Inspectors, testers, sorters, samplers, and weighers		38.0
maperiora, testera, sortera, samplera, and weighera		31.1
lowelers and precious stone and motal workers		
Jewelers and precious stone and metal workers  Medical, dental, and ophthalmic laboratory technicians		52.0

Table 11. Employed persons by detailed occupation and sex, 2004 annual averages —Continued

Occupation	Total employed	Percent women
Painting workers	191	13.1
Photographic process workers and processing machine operators	59	68.2
Paper goods machine setters, operators, and tenders	53	19.3
Helpersproduction workers	64	21.1
Transportation and material moving occupations		14.7
Supervisors, transportation and material moving workers	220	17.8
Aircraft pilots and flight engineers		5.3
Bus drivers	602	48.5
Driver/sales workers and truck drivers	3,276	4.5
Taxi drivers and chauffeurs	277	12.9
Railroad conductors and yardmasters		7.8
Parking lot attendants	77	13.3
Service station attendants	120	8.7
Crane and tower operators	65	4.0
Dredge, excavating, and loading machine operators		.1
Industrial truck and tractor operators	530	7.5
Cleaners of vehicles and equipment		11.9
Laborers and freight, stock, and material movers, hand	1,797	16.2
Machine feeders and offbearers	55	39.9
Packers and packagers, hand		60.8
Refuse and recyclable material collectors	81	8.2

NOTE: Data for occupations with fewer than 50,000 employed and for certain other occupations are not published separately but

are included in the totals for the appropriate categories shown. Thus, detailed occupations may not sum to the broader categories.

Table 12. Percent distribution of employed women by occupation, race, and Hispanic or Latino ethnicity, 2004 annual averages

Occupation	White	Black or African American	Asian	Hispanic or Latino ethnicity

<sup>&</sup>lt;sup>1</sup> The comparability of historical labor force data has been affected at various times by methodological and conceptual changes in the Current Population Survey (CPS). For an explanation, see the "Explanatory Notes and Estimates of Error" section of *Employment and Earnings*, a monthly BLS periodical.

NOTE: Beginning in 2003, estimates for the above race groups (white, black or African American, and Asian) include persons who

selected this race group only; persons who selected more than one race group are not included. Prior to 2003, persons who reported more than one race were included in the group they identified as the main race. Data for 2000-02 are for the category Asians and Pacific Islanders. Starting in 2003, Asians constitute a separate category. For more information, see the "Explanatory Notes and Estimates of Error" section of *Employment and Earnings*. Data for Asians were not tabulated prior to 2000.

<sup>&</sup>lt;sup>1</sup> Prior to 1994, total includes persons who usually work part-time but who worked 35 or more hours during the reference week; for 1994 and later years, such persons were included in the part-time total. In all years, the total includes those who usually work full time but who worked less than 35 hours during the reference week for noneconomic reasons, such as illness or holiday, and those absent from work for the entire reference week who usually work full time. These groups are not shown separately.

than 35 hours a week but who were absent from work for the entire reference week and for 1994 and later years, those who worked 35 or more hours during the reference week. These groups are not shown separately.

<sup>&</sup>lt;sup>2</sup> For all years, total includes those who usually work less

<sup>&</sup>lt;sup>3</sup> The comparability of historical labor force data has been affected at various times by methodological and conceptual changes in the Current Population Survey (CPS). For an explanation, see the "Explanatory Notes and Estimates of Error" section of *Employment and Earnings*, a monthly BLS periodical.

	4,890	151	3.1	49	102
	7,183	98	1.4	32	66
Full- and part-time status <sup>1</sup>					
Full-time workers	55,739	760	1.4	177	583
	24,788	460	1.9	100	360
	30,951	300	1.0	77	223
Part-time workers	18,046	1,240	6.9	343	897
	12,276	861	7.0	210	651
	5,770	378	6.6	132	246

<sup>&</sup>lt;sup>1</sup> The distinction between full- and part-time workers is based on hours usually worked. These data will not sum to totals because full- or part-time status on the principal job is not identifiable for a small number of multiple jobholders.

NOTE: The prevailing Federal minimum wage was \$5.15 per hour in 2004. Data are for wage and salary workers, excluding the incorporated self-employed. They refer to a person's earnings on

his or her sole or principal job, and pertain only to workers who are paid hourly rates. Salaried workers and other nonhourly workers are not included. Estimates for the above race groups (white, black or African American, and Asian) do not sum to totals because data are not presented for all races. In addition, persons whose ethnicity is identified as Hispanic or Latino may be of any race and, therefore, are classified by ethnicity as well as by race.

¹ Contingent workers are those who do not have an implicit or explicit contract for ongoing employment. Persons who do not expect to continue in their jobs for personal reasons, such as retirement or returning to school, are not considered contingent workers, provided that they would have the option of continuing in the job were it not for these personal reasons. Estimate 1 includes wage and salary workers who expect their jobs will last for an additional year or less and who had worked at their jobs for 1 year or less. Estimate 2 includes wage and salary work-

ers, the self-employed, and independent contractors who expect their employment to last for an additional year or less and who had worked at their jobs (or been self-employed) for 1 year or less. Estimate 3 includes all workers who do not expect their jobs to last. This is the broadest definition of contingency and estimates 1 and 2 of contingency are included in estimate 3. Noncontingent workers are those workers who do not fall into any of the three definitions of contingency.

<sup>&</sup>lt;sup>1</sup> Independent contractors are workers who were identified as independent contractors, independent consultants, or freelance workers, whether they were self-employed or wage and salary workers. On-call workers are workers who are called to work only as needed, although they can be scheduled to work for several days or weeks in a row. Temporary help agency workers are workers who were paid by a temporary help agency, whether or not their job was temporary. Workers provided by contract firms are workers who are employed by a company that provides them or their services to others under contract and who are usually

assigned to only one customer and usually work at the customer's worksite.

NOTE: Workers with traditional arrangements are those who do not fall into any of the "alternative arrangements" categories. Detail may not sum to totals because the total employed includes day laborers (an alternative arrangement, not shown separately) and a small number of workers who were both "on call" and "provided by contract firms."

<sup>-</sup> Dash represents zero.

 $<sup>^{\</sup>mbox{\scriptsize 1}}$  Includes persons who did not provide information on flexible schedules.

NOTE: Data relate to the sole or principal job of full-time wage and salary workers who were at work during the survey reference

week and exclude all self-employed persons, regardless of whether or not their businesses were incorporated. Detail for the above race and Hispanic-origin groups will not sum to totals because data for the "other races" group are not presented and Hispanics are included in both the white and black population groups. Own children include sons, daughters, stepchildren, and adopted children. Not included are nieces, nephews, grandchildren, and other related and unrelated children.

<sup>&</sup>lt;sup>2</sup> Persons with flexible schedules are able to vary or make changes in their beginning and ending hours of work, whether or not they have a formal flexitime program on their job.

With own children under 6	11,818	1,875	15.9	19.1	56.1	23.9
With no own children under 18	43,625	5,763	13.2	14.6	48.5	35.8

 $<sup>^{\</sup>mbox{\scriptsize 1}}$  Includes persons who did not provide information on work at home.

NOTE: Data refer to employed persons in nonagricultural industries. Own children include sons, daughters, stepchildren, and adopted children. Not included are nieces, nephews, grandchildren, and other related and unrelated children.

<sup>&</sup>lt;sup>2</sup> Persons who usually work at home are defined as those who work at home at least once per week as part of their primary job.

<sup>&</sup>lt;sup>3</sup> Unpaid family workers and wage and salary workers who did not report pay status are included in total but not shown separately.

<sup>&</sup>lt;sup>4</sup> Includes the incorporated and unincorporated self-employed.

Table 32. Displaced workers<sup>1</sup> by age, sex, race, Hispanic or Latino ethnicity, and employment status in January 2004 (Numbers in thousands)

Age, sex, race, and Hispanic			Percent distribution	on by employment s	tatus
or Latino ethnicity	Total	Total	Employed	Unemployed	Not in labor force

<sup>&</sup>lt;sup>1</sup> Data refer to persons who had 3 or more years of tenure on a job they had lost or left between January 2001 and December 2003 because of plant or company closings or moves, insufficient work, or the abolishment of their positions or shifts.

NOTE: Estimates for the above race groups (white, black or African American, and Asian) do not sum to totals because data are not presented for all races. In addition, persons whose ethnicity is identified as Hispanic or Latino may be of any race and, therefore, are classified by ethnicity as well as by race.

<sup>&</sup>lt;sup>2</sup> Data not shown where base is less than 75,000.

Table 33. Labor force status of 2004 high school graduates and 2003-04 high school dropouts 16 to 24 years old by school enrollment and sex, October 2004

<sup>&</sup>lt;sup>1</sup> Multiple jobholders as a percent of all employed persons in specified group.

NOTE: Data from 1994-2004 are not strictly comparable with data for prior years. For an explanation, see "Historical Comparability" under the Household Data section of "Explanatory Notes and Estimates of Error" in *Employment and Earnings*. Comprehensive surveys of multiple jobholders were not conducted in 1981-84, 1986-88, 1990, and 1992-93.

<sup>&</sup>lt;sup>2</sup> Data for years prior to 1977 refer to the black-and-other population group.

Table 36. Unincorporated self-employed persons in nonagricultural industries by sex, 1976-2004 annual averages

 $<sup>^{\</sup>rm 1}$  Native-born persons are those who were born in the United States or a U.S. Island Area such as Puerto Rico, or born abroad of a U.S.-citizen parent.

such as Puerto Rico or Guam, to parents neither of whom was a U.S. citizen. This group primarily includes legally admitted immigrants, but also includes refugees, students, temporary workers, and undocumented aliens.

<sup>&</sup>lt;sup>2</sup> Foreign born refers to people residing in the United States who were born outside the United States or one of its outlying areas,

<sup>&</sup>lt;sup>1</sup> Data refer to members of a labor union or an employee association similar to a union.

NOTE: Data refer to the sole or principal job of full- and part-time workers. All self-employed workers are excluded, regardless of whether or not their businesses are incorporated.

<sup>&</sup>lt;sup>2</sup> Data refer to members of a labor union or an employee association similar to a union, as well as workers who are not members but whose jobs are covered by a union or employee association contract.

<sup>&</sup>lt;sup>3</sup> Not strictly comparable with data for prior years. For an explanation, see "Historical Comparability" under the Household Data section of "Explanatory Notes and Estimates of Error" in *Employment and Earnings*.

## **Technical Note**

he estimates in this report were obtained from the Current Population Survey (CPS), a national monthly sample survey of approximately 60,000 households, which provides a wide range of information on the labor force, employment, and unemployment. Earnings data are collected from one-fourth of the CPS monthly sample. The survey is conducted for the Bureau of Labor Statistics by the U.S. Census Bureau, using a scientifically selected national sample with coverage in all 50 States and the District of Columbia.

Over its history, numerous changes have been made in the CPS questionnaire, methodology, and estimation procedures to improve the quality of the data that the survey produces. In January 2003, several major changes were introduced to the CPS. As a result, most data for 2003 forward are not strictly comparable with data for earlier years. These changes include the following:

- Population controls were updated by the Census Bureau to incorporate new intercensal information and assumptions about the growth of the population, especially estimates of net international migration.
- The survey questions on Hispanic ethnicity and race were modified to comply with new standards on race and ethnicity data from Federal agencies. In accordance with the new standards, individuals now are asked whether they are of Hispanic ethnicity before being asked about their race. Also, individuals now are asked directly if they are Spanish, Hispanic, or Latino, instead of being asked a general question on country of origin. With respect to race, the response category of Asian and Pacific Islanders was split into two categories: Asian, and Native Hawaiian or Other Pacific Islanders. In accordance with the new standards, individuals were allowed to choose more than one race category. Prior to 2003, individuals who considered themselves to belong to more than one race were required to select a single primary race. In this report, data by race for 2003 forward include only those who choose a single race category.
- New occupational and industrial classification systems were introduced. These systems were derived from the 2000 Standard Occupational Classification (SOC) and the 2002 North American Industry Classification System (NAICS). The new classification systems differ substantially from the previous systems. The introduction of the

new occupational and industrial classification systems effectively created a break in series from 2000 forward for data disaggregated by class of worker status—that is, the classification of workers as either self-employed or wage and salary. This change resulted in a slightly lower estimate of the number of wage and salary workers and in minor revisions to the earnings measures for 2000-2002. Users therefore may note some differences with previously published women's-to-men's earnings ratios for those years.

Additionally, data for 2004 are not strictly comparable with data for 2003 and earlier years because of the introduction in January 2004 of further revisions to the population controls used in the CPS.

For more information about these and other recent changes to the survey, see "Revisions to the Current Population Survey Effective in January 2003" in the February 2003 issue of *Employment and Earnings* on the Internet at **www.bls.gov/cps/rvcps03.pdf** or the "Explanatory Notes and Estimates of Error" section of the February 2005 and subsequent issues of *Employment and Earnings*.

## **Concepts and Definitions**

Concepts used in this report are defined below.

*Civilian labor force*. This group comprises all persons classified as employed or unemployed.

Employed persons. Employed persons are those who, during the survey week, (a) did any work at all as paid civilians; (b) worked in their own business or profession or on their own farm; (c) worked 15 hours or more as unpaid workers in a family business; or (d) were temporarily absent from their jobs because of illness, vacation, bad weather, or another reason.

Unemployed persons. Unemployed persons are those who had no employment during the survey week, were available for work at that time, and made specific efforts to find employment sometime in the prior 4 weeks. Persons laid off from their former jobs and awaiting recall did not need to be looking for work to be classified as unemployed.

*Civilian labor force participation rate.* This rate is the civilian labor force as a percent of the civilian noninstitutional population.

*Unemployment rate*. This rate represents the number unemployed as a percent of the civilian labor force.

Race. White, black or African American, and Asian are terms used to describe the race of persons. Persons in these categories are those who selected that race group only. Data for the remaining race categories—American Indian or Alaska Native, Native Hawaiian or Other Pacific Islanders, and persons who selected more than one race category—are included in totals but are not shown separately because the number of survey respondents was too small to develop estimates of sufficient quality for publication. In the enumeration process, race is determined by the household respondent.

Hispanic or Latino ethnicity. This term refers to persons who identified themselves in the CPS enumeration process as being Spanish, Hispanic, or Latino. Persons whose ethnicity is identified as Hispanic or Latino may be of any race.

Family. A family is a group of two or more persons residing together who are related by birth, marriage, or adoption. Families are classified either as married-couple families or as families maintained by women or men without spouses.

Usual weekly earnings. Data are collected on wages and salaries before taxes and other deductions and include any overtime pay, commissions, or tips usually received (at the principal job in the case of multiple jobholders). Earnings of self-employed workers are excluded, regardless of whether their businesses are incorporated. Prior to 1994, respondents were asked how much they usually earned per week. Since January 1994, respondents have been asked to identify the easiest way for them to report earnings (hourly, weekly, biweekly, twice monthly, monthly, annually, other) and how much they usually earn in the reported period. Earnings reported on a basis other than weekly are converted to a weekly equivalent. The term "usual" is as perceived by the respondent. If the respondent asks for a definition of usual, interviewers are instructed to define the term as more than half the weeks worked during the past 4 or 5 months.

Medians of weekly earnings. The median is the amount that divides a given earnings distribution into two equal groups, one having earnings above the median, and the other having earnings below the median. The BLS estimating procedure for determining the median of an earnings distribution places each reported or calculated weekly earnings value into a \$50-wide interval that is centered on a multiple of \$50. The value of the median is estimated through a linear interpolation of the interval in which the median lies. Over-the-year changes

in the medians for specific groups may not necessarily be consistent with the movements estimated for the overall group boundary. The most common reasons for this possible anomaly follow: (1) There could be a change in the relative weights of the subgroups. For example, the medians of both 16- to 24-year-olds and those 25 years and over may rise, but if the lower earning 16-to-24 age group accounts for a greatly increased share of the total, the overall median could actually fall. (2) There could be a large change in the shape of the distribution of reported earnings. This could be caused by survey observations that are clustered at rounded values, for example, \$250, \$300, or \$400. An estimate lying in a \$50-wide centered interval containing such a cluster, or "spike," tends to change more slowly than one in other intervals. Medians, for example, measure the central tendency of a multipeaked distribution that shifts over time. As the distribution shifts, the median does not necessarily move at the same rate. Specifically, the median takes relatively more time to move through a frequently reported interval but, once above the upper limit of such an interval, it can move relatively quickly to the next frequently reported earnings interval. BLS procedures for estimating medians mitigate such irregular movements of the measures; however, users should be cautious of these effects when evaluating short-term changes in the medians, as well as in ratios of the medians.

Hours at work. These are the actual hours worked during the reference week. For example, persons who normally work 40 hours a week but were off during Columbus Day holiday would be reported as working 32 hours, even though they were paid for the holiday.

Usual hours, or usual full- or part-time status. Data on persons "at work" exclude persons who were temporarily absent from a job and therefore classified in the zero-hoursworked category, "with a job but not at work." These are persons who were absent from their jobs for the entire week for reasons such as bad weather, vacation, illness, or involvement in a labor dispute. To differentiate a person's normal schedule from his or her activity during the reference week, persons also are classified according to their usual full- or part-time status. In this context, full-time workers are those who usually worked 35 hours or more (at all jobs combined). This group includes some individuals who worked less than 35 hours in the reference week for either economic or noneconomic reasons and those who were temporarily absent from work. Similarly, part-time workers are those who usually work less than 35 hours per week (at all jobs), regardless of the number of hours worked in the reference week. This may include some individuals who actually worked more than 34 hours in the reference week, as well as those who are temporarily absent from work.

Wage and salary workers. These are workers who receive wages, salaries, commissions, tips, payment in kind, or piece rates. The group includes employees in both the private and public sectors but, for purposes of the earnings series, ex-

cludes all self-employed persons, regardless of whether their businesses are incorporated.

Hourly paid workers. Workers who are paid an hourly wage are a subset of wage and salary workers, representing approximately three-fifths of all wage and salary workers. Workers paid by the hour are, therefore, included in the full- and part-time worker tables in this report, along with salaried workers and other workers not paid by the hour. (Data for workers paid at hourly rates are presented separately.)

Work experience. These data reflect the work activity during the calendar year and are obtained from the Annual Social and Economic Supplement (ASEC) to the Current Population Survey. Persons who worked were those who answered "yes" to the following questions from the ASEC: "Did you work at a job or business at any time during (the year)?" or "Did you do any temporary, part-time, or seasonal work even for a few days during (the year)?" Since the reference period is a full year, the number of persons with some employment or unemployment greatly exceeds the average levels for any given month, which are based on a 1-week reference period, and the corresponding annual averages of monthly estimates.

## Reliability

Statistics based on the CPS are subject to both sampling and

nonsampling error. When a sample, rather than an entire population, is surveyed, there is a chance that the sample estimates may differ from the "true" population values they represent. The exact difference, or *sampling error*, varies depending on the particular sample selected, and this variability is measured by the standard error of the estimate. There is about a 90-percent chance, or level of confidence, that an estimate based on a sample will differ by no more than 1.6 standard errors from the "true" population value because of sampling error. BLS analyses are generally conducted at the 90-percent level of confidence. Standard errors included in this report were rounded for presentation purposes, as were the earnings estimates. Consequently, a precise confidence interval cannot be constructed using these data.

CPS data also are affected by *nonsampling error*. Nonsampling error can occur for many reasons, including the failure to sample a segment of the population, inability to obtain information for all respondents in the sample, inability or unwillingness of respondents to provide correct information, and errors made in the collection or processing of data.

For a full discussion of the reliability of data from the CPS and information on estimating standard errors, see the "Explanatory Notes and Estimates of Error" section of the Bureau of Labor Statistics *Employment and Earnings* publication.
