Occupational Employment and Wages for Registered Nurses and Nursing Assistants in New York’s Metropolitan Areas – May 2015

Among the 12 metropolitan areas in New York, 9 had annual wages that were significantly below the national average for registered nurses, and 9 had below-average wages for licensed practical and licensed vocational nurses, the U.S. Bureau of Labor Statistics reported today. No metropolitan area in New York had significantly below-average wages for nursing assistants. Chief Regional Economist Martin Kohli noted that New York-Newark-Jersey City was the only metropolitan area in New York to have an average wage significantly above the U.S. average for each of the three selected occupations. Nationwide, the average (mean) annual wage for registered nurses was \$71,000; for licensed practical and licensed vocational nurses, \$44,030; and for nursing assistants, \$26,820. (See [table A](#). For comprehensive definitions of metropolitan areas in New York, please see [Technical Note](#).)

Of the 12 metropolitan areas located entirely or partially in the state, the New York-Newark-Jersey City area had the largest numbers of registered nurses, licensed practical and licensed vocational nurses, and nursing assistants, with employment of 307,530 in the three occupations combined. Over two-thirds (214,390) of these jobs were located in 1 of the area's 4 divisions, New York-Jersey City-White Plains. Another division, Nassau County-Suffolk County, had 45,970 jobs in the selected nursing occupations. For each of the remaining metropolitan areas in New York, employment in these three occupations combined was less than 22,000. (See [table B](#). The New York-Newark-Jersey City area's other division, Newark, contains no counties in New York, and its data have not been presented in this release.)

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the New York State Department of Labor and the New Jersey Department of Labor and Workforce Development.

Note

With the issuance of data for May 2015, the OES program has incorporated redefined metropolitan area definitions as designated by the Office of Management and Budget. OES data are available for 394 metropolitan areas, 38 metropolitan divisions, and 167 OES-defined nonmetropolitan areas. A listing of the areas and their definitions can be found at www.bls.gov/oes/current/msa_def.htm.

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

Technical Note

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OES program produces employment and wage estimates for over 800 occupations for all industries combined in the nation; the 50 states and the District of Columbia; 432 metropolitan areas and divisions; 167 nonmetropolitan areas; and Guam, Puerto Rico, and the U.S. Virgin Islands. National estimates are also available by industry for NAICS sectors, 3-, 4-, and selected 5- and 6-digit industries, and by ownership across all industries and for schools and hospitals. OES data are available at www.bls.gov/oes/tables.htm.

OES estimates are constructed from a sample of about 1.2 million establishments. Forms are mailed to approximately 200,000 sampled establishments in May and November each year. May 2015 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2015, November 2014, May 2014, November 2013, May 2013, and November 2012. The overall national response rate for the six panels is 73.5 percent based on establishments and 69.6 percent based on weighted sampled employment. (Response rates are slightly lower for these estimates due to the federal shutdown in October 2013.) The unweighted employment of sampled establishments across all six semiannual panels represents approximately 57.9 percent of total national employment. For more information about OES concepts and methodology, go to www.bls.gov/news.release/ocwage.tn.htm.

The May 2015 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2012 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at www.bls.gov/soc and information about the 2012 NAICS is available at www.bls.gov/bls/naics.htm.
