Occupational Employment and Wages for Three Counselor Occupations in Selected Metropolitan Areas in New York – May 2016

Among six selected metropolitan areas in New York, five areas had annual wages that were significantly below the national average for mental health counselors. Four areas had below-average wages for rehabilitation counselors, and one area had below-average wages for substance abuse and behavioral disorder counselors, the U.S. Bureau of Labor Statistics reported today. Chief Regional Economist Martin Kohli noted that New York-Newark-Jersey City had above-average wages in two of the three selected occupations. Nationwide, the average (mean) wage for mental health counselors was \$46,050, for rehabilitation counselors, \$38,740, and for substance abuse and behavioral disorder counselors, \$44,160. (See [table A](#). For comprehensive definitions of metropolitan areas in New York, please see [Technical Note](#).)

Note: An asterisk indicates that the mean annual wage for this area is significantly different from the national average of all areas at the 90-percent confidence level.

Of the six selected metropolitan areas located entirely or partially in the state, the New York-Newark- Jersey City area had the largest numbers of mental health, rehabilitation, and substance abuse and behavioral disorder counselors, with a combined employment of 21,320 in the three counselor occupations. Seventy percent (14,990) of those jobs were located in one of the area’s four divisions, New York- Jersey City-White Plains. Another division, Nassau County-Suffolk County, had 2,640 jobs in the selected counselor

occupations. Employment in these three occupations combined was less than 1,500 in each of the remaining metropolitan areas in New York. (See [table B](#). The New York-Newark-Jersey City area’s other division, Newark, contains no counties in New York, and its data have not been presented in this release.)

Wages for mental health counselors in selected metropolitan areas in New York

Mental health counselors in the New York-Newark-Jersey City metropolitan area earned \$48,020 per year, measurably above the U.S. average of \$46,050. In contrast, the other five metropolitan areas had significantly below-average wages for this occupation, ranging from \$35,200 in Buffalo-Cheektowaga-Niagara Falls to \$39,440 in Utica-Rome.

Wages for rehabilitation counselors in selected metropolitan areas in New York

One metropolitan area, Utica-Rome, had an average wage for rehabilitation counselors (\$44,130) that was significantly higher than the \$38,740 national average. Four of the selected metropolitan areas had below-average wages for rehabilitation counselors, including Rochester (\$32,870) and Albany-Schenectady-Troy (\$33,470). The average wage for rehabilitation counselors in New York-Newark-Jersey City was not measurably different from the U.S. average.

Wages for substance abuse and behavioral disorder counselors in selected metropolitan areas in New York

Substance abuse and behavioral disorder counselors in New York-Newark-Jersey City earned \$53,650 per year, measurably above the U.S. average of \$44,160 for this occupation. The annual mean wage in Rochester (\$42,320) for this occupation was significantly below the national average. Average wages for substance abuse and behavioral disorder counselors in the four other areas were not measurably different from the U.S. average.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the New York State Department of Labor and the New Jersey Department of Labor and Workforce Development.

Note

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

Technical Note

The Occupational Employment Statistics (OES) survey is a semiannual survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 650 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), metropolitan divisions, nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-, 4-, and selected 5- and 6-digit industry levels; and national estimates by ownership across all industries and for schools and hospitals. OES data are available at www.bls.gov/oes/tables.htm.

OES estimates are constructed from a sample of about 1.2 million establishments. Each year, two semiannual panels of approximately 200,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2016 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2016, November 2015, May 2015, November 2014, May 2014, and November 2013. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 73 percent based on establishments and 69 percent based on weighted sampled employment. The unweighted employment of sampled establishments across all six semiannual panels represents approximately 58 percent of total national employment. For more information about OES concepts and methodology, go to www.bls.gov/oes/current/oes_tec.htm.

The May 2016 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2012 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at www.bls.gov/soc and information about the 2012 NAICS is available at www.bls.gov/bls/naics.htm.
