Occupational Employment and Wages in Redding — May 2016

Workers in the Redding Metropolitan Statistical Area had an average (mean) hourly wage of \$22.56 in May 2016, about 5 percent below the nationwide average of \$23.86, according to the U.S. Bureau of Labor Statistics. Assistant Commissioner for Regional Operations Richard Holden noted that, after testing for statistical significance, wages in the local area were lower than their respective national averages in 9 of the 22 major occupational groups, including management; computer and mathematical; and legal. Five groups had significantly higher wages than their respective national averages, including protective service; healthcare practitioners and technical; and healthcare support.

When compared to the nationwide distribution, local employment was more highly concentrated in 9 of the 22 occupational groups, including healthcare practitioners and technical; sales and related; and personal care and service. Conversely, seven groups had employment shares significantly below their national representation, including production; business and financial operations; and computer and mathematical. (See [table A](#) and [box note](#) at end of release.)

Table A. Occupational employment and wages by major occupational group, United States and the Redding Metropolitan Statistical Area, and measures of statistical significance, May 2016

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Redding	United States	Redding	Percent difference (1)
Total, all occupations	100.0	100.0	\$23.86	\$22.56*	-5
Management	5.1	4.9	56.74	45.54*	-20
Business and financial operations.....	5.2	2.9*	36.09	31.16*	-14
Computer and mathematical	3.0	1.0*	42.25	32.96*	-22

Installation, maintenance, and repair	3.9	4.4*	22.45	22.67	1

Note: See footnotes at end of table.

Table A. Occupational employment and wages by major occupational group, United States and the Redding Metropolitan Statistical Area, and measures of statistical significance, May 2016 - Continued

Major occupational group	Percent of total employment		Mean hourly wage		
	United States	Redding	United States	Redding	Percent difference ⁽¹⁾
Production	6.5	3.2*	17.88	18.65	4
Transportation and material moving	6.9	5.6*	17.34	17.28	0

Footnotes:

(1) A positive percent difference measures how much the mean wage in the Redding Metropolitan Statistical Area is above the national mean wage, while a negative difference reflects a lower wage.

(2) Estimate not released

* The percent share of employment or mean hourly wage for this area is significantly different from the national average of all areas at the 90-percent confidence level.

One occupational group—healthcare practitioners and technical—was chosen to illustrate the diversity of data available for any of the 22 major occupational categories. Redding had 4,550 jobs in healthcare practitioners and technical, accounting for 7.5 percent of local area employment, significantly higher than the 5.9-percent share nationally. The average hourly wage for this occupational group locally was \$43.56, significantly above the national wage of \$38.06.

Some of the larger detailed occupations within the healthcare practitioners and technical group included registered nurses (1,760), licensed practical and licensed vocational nurses (340), and pharmacy technicians (190). Among the higher paying jobs were family and general practitioners and general dentists, with mean hourly wages of \$92.03 and \$71.03, respectively. At the lower end of the wage scale were veterinary technologists and technicians (\$15.61) and dietetic technicians (\$16.80). (Detailed occupational data for healthcare practitioners and technical are presented in [table 1](#); for a complete listing of detailed occupations available go to www.bls.gov/oes/2016/may/oes_39820.htm.)

Location quotients allow us to explore the occupational make-up of a metropolitan area by comparing the composition of jobs in an area relative to the national average. (See [table 1](#).) For example, a location quotient of 2.0 indicates that an occupation accounts for twice the share of employment in the area than it does nationally. In the Redding Metropolitan Statistical Area, above-average concentrations of employment were found in many of the occupations within the healthcare practitioners and technical group. For instance, respiratory therapists were employed at 2.4 times the national rate in Redding, and family and general practitioners, at 2.3 times the U.S. average. On the other hand, dental hygienists had a location quotient of 1.1 in Redding, indicating that this particular occupation’s local and national employment shares were similar.

These statistics are from the Occupational Employment Statistics (OES) survey, a federal-state cooperative program between BLS and State Workforce Agencies, in this case, the California Employment Development Department.

Notes on Occupational Employment Statistics Data

A value that is statistically different from another does not necessarily mean that the difference has economic or practical significance. Statistical significance is concerned with the ability to make confident statements about a universe based on a sample. It is entirely possible that a large difference between two values is not significantly different statistically, while a small difference is, since both the size and heterogeneity of the sample affect the relative error of the data being tested.

Technical Note

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. The OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 650 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), metropolitan divisions, nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-, 4-, and selected 5- and 6-digit industry levels, and national estimates by ownership across all industries and for schools and hospitals. OES data are available at www.bls.gov/oes/tables.htm.

OES estimates are constructed from a sample of about 1.2 million establishments. Each year, two semiannual panels of approximately 200,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2016 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2016, November 2015, May 2015, November 2014, May 2014, and November 2013. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 73 percent based on establishments and 69 percent based on weighted sampled employment. The unweighted employment of sampled establishments across all six semiannual panels represents approximately 58 percent of total national employment. The sample in the Redding Metropolitan Statistical Area included 1,094 establishments with a response rate of 76 percent. For more information about OES concepts and methodology, go to www.bls.gov/news.release/ocwage.tn.htm.

The May 2016 OES estimates are based on the 2010 Standard Occupational Classification (SOC) system and the 2012 North American Industry Classification System (NAICS). Information about the 2010 SOC is available on the BLS website at www.bls.gov/soc and information about the 2012 NAICS is available at www.bls.gov/bls/naics.htm.

Metropolitan area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget.

The **Redding, Calif. Metropolitan Statistical Area** includes Shasta County.

Additional information

OES data are available on our regional web page at www.bls.gov/regions/west. Answers to frequently asked questions about the OES data are available at www.bls.gov/oes/oes_ques.htm. Detailed technical information about the OES survey is available in our Survey Methods and Reliability Statement on the BLS website at www.bls.gov/oes/current/methods_statement.pdf.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.

Table 1. Employment and wage data from the Occupational Employment Statistics survey, by occupation, Redding Metropolitan Statistical Area, May 2016

Occupation ⁽¹⁾	Employment		Mean wages	
	Level ⁽²⁾	Location quotient ⁽³⁾	Hourly	Annual ⁽⁴⁾
Healthcare practitioners and technical occupations	4,550	1.3	\$43.56	\$90,610
Dentists, general	80	1.7	71.03	147,750
Dietitians and nutritionists	60	2.3	30.79	64,030
Pharmacists.....	140	1.1	66.44	138,200
Family and general practitioners	120	2.3	92.03	191,420
Physicians and surgeons, all other.....	80	0.6	84.53	175,830
Physician assistants	70	1.6	62.57	130,150
Physical therapists	110	1.2	47.92	99,680
Respiratory therapists	130	2.4	36.41	75,720
Speech-language pathologists	70	1.2	44.34	92,220
Veterinarians	60	2.0	49.63	103,230
Registered nurses	1,760	1.4	46.24	96,180
Nurse practitioners	50	0.8	49.61	103,180
Medical and clinical laboratory technologists	80	1.1	44.26	92,050
Medical and clinical laboratory technicians	30	0.5	19.40	40,360
Dental hygienists	90	1.1	43.57	90,620
Diagnostic medical sonographers	30	1.1	43.97	91,450
Radiologic technologists.....	140	1.7	34.95	72,690
Emergency medical technicians and paramedics	80	0.8	27.75	57,730
Dietetic technicians	30	2.5	16.80	34,940
Pharmacy technicians	190	1.1	19.49	40,540
Surgical technologists	50	1.2	31.55	65,610
Veterinary technologists and technicians	80	1.8	15.61	32,470
Licensed practical and licensed vocational nurses	340	1.1	24.01	49,950
Medical records and health information technicians	180	2.1	25.12	52,240
Health technologists and technicians, all other	100	1.9	21.89	45,530

Footnotes:

- (1) For a complete listing of all detailed occupations in the Redding Metropolitan Statistical Area, see www.bls.gov/oes/current/oes_39820.htm
- (2) Estimates for detailed occupations do not sum to the totals because the totals include occupations not shown separately. Estimates do not include self-employed workers.
- (3) The location quotient is the ratio of the area concentration of occupational employment to the national average concentration. A location quotient greater than one indicates the occupation has a higher share of employment than average, and a location quotient less than one indicates the occupation is less prevalent in the area than average.
- (4) Annual wages have been calculated by multiplying the hourly mean wage by a "year-round, full-time" hours figure of 2,080 hours; for those occupations where there is not an hourly mean wage published, the annual wage has been directly calculated from the reported survey data.
